The Dying Patient:

The Dying Patient: a Nursing Perspective Mary H. Browning, Edith Patton Lewis, 1972
Caughill, 1976
The Dying Process Julia Lawton, 2002-01-04 Taking as its focus a highly emotive area of study The Dying Process draws on the experiences of daycare and hospice patients to provide a forceful new analysis of the period of decline prior to death Placing the bodily realities of dying very firmly centre stage and questioning the ideology central to the modern hospice movement of enabling patients to live until they die Julia Lawton shows how our concept of a good death is open to interpretation Her study examines the non negotiable effects of a patient's bodily deterioration on their sense of self and in so doing offers a powerful new perspective in embodiment and emotion in death and dying A detailed and subtle ethnographic study The Dying Process engages with a range of deeply complex and ethically contentious issues surrounding the care of dying patients in hospices and elsewhere

Care of the Dying Patient David A. Fleming, John C. Hagan, 2010-04-15 Although the need for improved care for dying patients is widely recognized and frequently discussed few books address the needs of the physicians nurses social workers therapists hospice team members and pastoral counselors involved in care *Care of the Dying Patient* contains material not found in other sources offering advice and solutions to anyone professional caregiver or family member confronted with incurable illness and death Its authors have lectured and published extensively on care of the dying patient and here review a wide range of topics to show that relief of physical suffering is not the only concern in providing care This collection encompasses diverse aspects of end of life care across multiple disciplines offering a broad perspective on such central issues as control of pain and other symptoms spirituality the needs of caregivers and special concerns regarding the elderly In its pages readers will find out how to effectively utilize palliative care services and activate timely referral to hospice arrange for care that takes into account patients cultural beliefs and respond to spiritual and psychological distress including the loss of hope that often overshadows physical suffering The authors especially emphasize palliative care and hospice since some physicians fear that such referrals may be viewed by patients and families as abandonment They also address ethical and legal risks in pain management and warn that fear of overprescribing pain medication may inadvertently lead to ineffective pain relief and even place the treating team at risk of liability for undertreatment of pain While physicians have the ability to treat disease they also help to determine the time and place of death and they must recognize that end of

Nursing the Dying Patient John Costello, 2004-08-27 This text introduces the reader to the key issues surrounding care of the dying patient as well as highlighting the importance of context in the social management of dying Written in a

pragmatic style it provides a foundation from which to consider the theoretical and practical concerns that are central to terminal care in institutional as well as community based settings Illustrated with case studies that demonstrate how the themes of the book can be applied in practice this text encourages readers to reflect on research findings so that they are stimulated to formulate their own ideas about caring for dying patients

The Dying Patient E. Wilkes, 2012-12-06 The main purpose of this book is to bring together some description of the skills and attitudes of those working in the hospice units specializing in terminal care with those rather different but overlapping skills used daily in the palliation of chronic or incurable disease This varied collection of papers does not pretend to be exhaustive Among the omissions for example are two major causes of death chronic respiratory disease and stroke This is because the treatment of the end state of these conditions and they are not alone in this lies more in the gentle withdrawal of measures no longer appropriate rather than in any positive regime within the gift of the physician This may lead on occasion to an unjustifiable diminution of interest but this is less likely in cases of cardiac or malignant disease Ischaemic heart disease remains the main killer of the western world We may see important changes in our approach over the next decade as we document slowly and painstakingly the comparative ineffectiveness of our therapy but in cases of progressive cardiac disease no matter how we may argue as to management or prevention we are agreed that we must lighten the dreary burden of illness as effectively as possible

The Inevitable Hour Emily K. Abel, 2013-05-01 Changes in health care have dramatically altered the experience of dying in America At the turn of the twentieth century medicine's imperative to cure disease increasingly took priority over the demand to relieve pain and suffering at the end of life Filled with heartbreaking stories *The Inevitable Hour* demonstrates that professional attention and resources gradually were diverted from dying patients Emily K Abel challenges three myths about health care and dying in America First that medicine has always sought authority over death and dying second that medicine superseded the role of families and spirituality at the end of life and finally that only with the advent of the high tech hospital did an institutional death become dehumanized Abel shows that hospitals resisted accepting dying patients and often worked hard to move them elsewhere Poor terminally ill patients for example were shipped from Bellevue Hospital in open boats across the East River to Blackwell's Island where they died in hovels mostly without medical care Some terminal patients were not forced to leave yet long before the advent of feeding tubes and respirators dying in a hospital was a profoundly dehumanizing experience With technological advances passage of the Social Security Act and enactment of Medicare and Medicaid almshouses slowly disappeared and conditions for dying patients improved though as Abel argues the prejudices and approaches of the past are still with us The problems that plagued nineteenth century almshouses can be found in many nursing homes today where residents often receive substandard treatment A frank portrayal of the medical care of dying people past and present The

Inevitable Hour helps to explain why a movement to restore dignity to the dying arose in the early 1970s and why its goals have been so difficult to achieve
