Theology May/June 2000 SPCK Publishing,2000-04 **The Oxford Handbook of Feminist Theology** Mary McClintock Fulkerson,Sheila Briggs,2012 This volume highlights the relevance of globalization and the insights of gender studies and religious studies for feminist theology It focuses on the changing global contexts for the field and its movement towards new models of theology distinct from the forms of traditional Christian systematic theology and of secular feminism **Galileo and the Conflict between Religion and Science** Gregory Dawes,2016-01-22 For more than 30 years historians have rejected what they call the warfare thesis the idea that there is an inevitable conflict between religion and science insisting that scientists and believers can live in harmony This book disagrees Taking as its starting point the most famous of all such conflicts the Galileo affair it argues that religious and scientific communities exhibit very different attitudes to knowledge Scripturally based religions not only claim a source of knowledge distinct from human reason They are also bound by tradition insist upon the certainty of their beliefs and are resistant to radical criticism in ways in which the sciences are not If traditionally minded believers perceive a clash between what their faith tells them and the findings of modern science they may well do what the Church authorities did in Galileo s time They may attempt to close down the science insisting that the authority of God s word trumps that of any merely human knowledge Those of us who value science must take care to ensure this does not happen **The Christian Religion and Biotechnology** George P. Smith,2005-06-18 Religion is a dominant force in the lives of many Americans It animates challenges directs and shapes as well the legal political and scientific agendas of the new Age of Biotechnology In a very real way religion biomedical technology and law are epistemologically different Yet they are equal vectors of force in defining reality and approaching an understanding of it Indeed all three share a synergetic relationship for they seek to understand and improve the human condition This book strikes a rich balance between thorough analysis in the body anchored in sound references to religion law and medical scientific analysis and a strong scholarly direction in the end notes It presents new insights into the decision making processes of the new Age of Biotechnology and shows how religion law and medical science interact in shaping directing and informing the political processes This volume will be of interest to both scholars and practitioners in the fields of religion and theology philosophy ethics family law science medicine political science and public policy and gender studies It will serve as a reference source and can be used in graduate and undergraduate courses in law medicine and religion Avery Cardinal Dulles, SJ Patrick W.
