

*Deductive, objective, generalisable,  
value-free knowledge*

*Inductive, subjective, context-specific,  
value-laden knowledge*

**Positivism**

Social phenomena can be explained using scientific methods

**Constructivism**

The individual mind creates meaning and reality

**Post-structuralism**

Meaning is coded in discourses and languages

**Post-positivism**

Social phenomena can be predicted only by using multiple methods

**Interpretivism**

The social world is too multifaceted to be explained by natural science methods

**Post-modernism**

Truth claims and methods are equally distrusted

**Critical theory**

Research is used to change situations (e.g., empower the subjects of social inquiry)

**Pragmatism**

The end justifies the means; all methods are equally good if they contribute to the understanding of the research problem

**Philosophy and the Spontaneous Philosophy of the Scientists** Louis Althusser, 2012-01-16 The publication in 1965 of *For Marx* and *Reading Capital* established Louis Althusser as one of the most original and controversial figures in the Western Marxist tradition a thinker whose renewal of Marxism was to enjoy great influence over the next decade Collected here are Althusser's most significant philosophical writings from 1965 to 1978 the majority previously untranslated Intended to contribute in his own words to a left wing critique of Stalinism that would help put some substance back into the revolutionary project here in the West they are the record of a shared history At the same time they chart Althusser's critique of the theoretical system unveiled in his own major works and his developing practice of philosophy as a revolutionary weapon The collection opens with two lucid early articles *Theory Theoretical Practice and Theoretical Formation* and *On Theoretical Work* The title piece Althusser's celebrated lectures in the *Philosophy Course for Scientists* is the fullest exploration of his new definition of philosophy as politics in the realm of theory a conception which is further developed in *Lenin and Philosophy Is it Simple to be a Marxist in Philosophy* provides an invaluable account of Althusser's intellectual development The volume concludes with two little known late pieces *The Transformation of Philosophy* in which the paradoxical history of Marxist philosophy is investigated and *Marxism Today* a sober balance sheet of the Marxist tradition Attesting to the unique place which Althusser has occupied in modern intellectual history between a tradition of Marxism which he sought to reconstruct and a post Marxism which has eclipsed its predecessor these texts are indispensable reading

*Science and the Sociology of Knowledge (RLE Social Theory)* Michael Mulkay, 2014-08-07 How far is scientific knowledge a product of social life In addressing this question the major contributors to the sociology of knowledge have agreed that the conclusions of science are dependent on social action only in a very special and limited sense In *Science and the Sociology of Knowledge* Michael Mulkay's first aim is to identify the philosophical assumptions which have led to this view of science as special and to present a systematic critique of the standard philosophical account of science showing that there are no valid epistemological grounds for excluding scientific knowledge from the scope of sociological analysis The rest of the book is devoted to developing a preliminary interpretation of the social creation of scientific knowledge The processes of knowledge creation are delineated through a close examination of recent case studies of scientific developments Dr Mulkay argues that knowledge is produced by means of negotiation the outcome of which depends on the participants use of social as well as technical resources The analysis also shows how cultural resources are taken over from the broader social milieu and incorporated into the body of certified knowledge and how in the political context of society at large scientists technical as well as social claims are conditioned and affected by their social position
