An Introduction to Theories of Human Development Neil J Salkind, 2004-01-22 The book is well written and the theorists and their respective work are well presented and clearly explained As a text dealing with the historical overview of major theorists and their work in human development over the last century or so it is extremely strong and could be widely used in a variety of both undergraduate and graduate courses Ann C Diver Starnes Humboldt State University In general I found the websites and references listed at the end of each chapter to be very interesting and useful for taking students beyond what is in the text Jane Ledingham University of Ottawa A fine choice for a classic theories course and I believe that the level of presentation would be appropriate for advanced undergraduate or graduate students The up to date web sites at the end of each section are a definite plus The choice of sites is excellent Cosby Steele Rogers Virginia Tech An Introduction to Theories of Human Development examines the development process looking at the series of changes that occur as a result of an interaction between biological and environmental factors Why might our behavior as an adult be so different from when we were infants Why and how does one stage of development follow the next Are the changes that we experience abrupt in nature or smooth and predictable Author Neil J Salkind reflects on such critical questions to help readers understand what happens along the way as one develops from infancy through later life This book provides a comprehensive view of the

primary theoretical models of human development including those from the biological psychoanalytic behavioral and cognitive developmental perspectives Along with a brief discussion of a historical background for each of these approaches An Introduction to Theories of Human Development examines the application of these theories to various aspects of human development such as the effectiveness of early intervention individual differences adolescence and sociobiology Features of this text A final integrative chapter compares the various theories presented in the book using Murry Sidman s model of six criteria for judging a theory to help develop students skills for critically assessing theory Classic approaches to understanding human behavior across the lifespan are also examined Pedagogical features such as chapter opening quotes boxed highlights key terms a glossary and websites for further reading enhance student understanding of everyday human behavior An Introduction to Theories of Human Development is an accessible text for advanced undergraduate students in the social and behavioral sciences including such fields as psychology education human services nursing sociology social welfare and human development and family studies

Newman, 2015-06-26 Key human development theories that continue to guide research and practice are examined in this engaging text Ten key theories are grouped into three families those that emphasize biological systems environmental factors and those that reflect an interaction between the two This organization enhances students ability to evaluate compare and contrast theories both within and across families Each family is introduced with an overview of their unique perspectives and the rationale for grouping them together Discussion of each theory includes the cultural historical context during the theory s development its key concepts and ideas extensions of the theory in contemporary work an example showing a modification of the theory an application of how the theory is used to inform practice and an analysis of how the theory answers 6 basic questions that a human development theory should address Each chapter includes an overview of the strengths and weaknesses of the theories to facilitate comparisons Theories that have a clear lifespan focus along with cases and examples that address issues across the lifespan are included The second edition features A new chapter on bioecological theory that highlights the increased use of this theory in the development of family school and community intervention programs A new epilogue that examines the same case via each of the ten theories illustrating their similarities and differences and how these ideas cast a unique light on a common situation New opening cases that bring theory to life along with narrative that links the case to the chapter s concepts guiding questions that help students compare theoretical perspectives critical thinking questions that focus on using the theory to interpret the case and personal life experiences and recommended resources that extend students understanding More examples from various disciplines that address topics students are likely to encounter as professionals A new glossary that defines the boldfaced key terms Enhanced website at www.psyppress.com 9781848726673 that provides instructors with a test bank Power points discussion questions and activities additional cases with questions teaching notes for using the book with various types of majors and a conversion guide outlining changes to

the new edition and students with key terms with hot links to their definitions chapter summaries and outlines and additional resources for further study Updated research and applications highlight the latest scientific developments Ideal for advanced undergraduate or beginning graduate courses in theories of development lifespan or child development taught in psychology human development family studies education and social work **Recent Theories of Human Development** R. Murray Thomas,2000-10-17 Intended as supplemental reading in courses on theories of development this book augments traditional core texts by providing students with more depth on about two dozen recent and emerging theories that have appeared over the course of the past 20 years This period has seen a decline of the traditional grand theories that attempt to apply to all people all the time in favor of micro theories that focus more on individual differences so a book like this actually points the way toward the future rather than dryly reviewing the past In addition the author inspects the changing ways in which the concept of theory itself has been interpreted during this period and he concludes with a chapter suggesting future directions

Theories of Human Development Neil J. Salkind,1985-01-18 Provides a clearly written basic introduction to the different theoretical approaches to understanding human development designed for the first year student of human development Features an overview and discussion of the maturational biological psychoanalytic behavioral and cognitive developmental theories of human development and includes applied examples of every theory and a set of seven questions used to compare and contrast theories presented throughout the book Theories of Human Growth and Development: Developmental Psychology Theresa Lowry-Lehnen,2015-05-12 Developmental psychology is the branch of psychology and the scientific study of how people grow and change over the course of a lifetime Originally concerned with infants and children it expanded to include adolescence adult development ageing and the entire lifespan Beginning with Sigmund Freud 1856 1939 and Jean Piaget 1896 1980 the early focus of developmental psychology was on the maturation of children Within the last three decades researchers who study human development have expanded their focus to examine change across a broad range of topics including psycho physiological processes cognitive development involving areas such as problem solving moral and conceptual understanding language acquisition social personality emotional development self concept and identity formation The scientific study of human growth and development is important not only to psychology but also to biology sociology anthropology education history and health care Most important however are its practical applications By better understanding how and why people change and grow the knowledge can be applied to help people to reach their full potential **Theories of Human Development** Michael G. Green,John A. Piel,2015-07-14 The authors have grouped the theories into three classical families which differ in their views relative to the prime motives underlying human nature They show how theories are specific examples of more general points of view called paradigms The theories chosen to represent the three paradigms the Endogenous Paradigm Exogenous Paradigm and the Constructivist Paradigm were selected because they met four criteria importance as judged by academic and research psychologists fertility as judged by the amount of

research the theory has generated scope as judged by the variety of phenomena the various theories explain family resemblance as judged by how well each theory represents its paradigm The authors present the paradigm case in the lead chapter for each paradigm This paradigm case is the best example for the paradigm The authors explain why paradigm cases are important and give them more detailed treatment than other theories in the same paradigm

Human Development Theories R Murray Thomas,1999-08-27 By examining each theory through a cultural lens Human Development Theories provides readers with the unusual perspective of being able to step outside of our own cultural heritage and to view other cultures as being equally viable reasonable and comprehensible The writing is crystal clear and the author has done a superb job of defining the 25 theories in a way that is at once accessible and stimulating I would rank Human Development Theories as outstanding Ann C Diver Stamnes Department of Education Humboldt State University California *Theories of Human Development* Michael Green,1989 [Theories of Human Development](#) Dale Goldhaber,2000 Theories of Human Development is an introduction to the currently viable theories of human development what they are how they are developed and how they are validated The theories are presented within a three part framework that includes the mechanistic organismic and contextualist perspectives Contemporary theorists discussed in this text include Albert Bandura Robert Siegler Katherine Nelson Esther Thelen Gerald Edelman Robert Kegan Glenn Elder and others

Creating Human Development Theories R. Murray Thomas,2014-05-12 How and why do humans develop as they do This book clearly explains the key components of human development theories and describes how to compose novel theories regarding this age old puzzle As college students progress through bachelor s degree programs and then advance to their master s degree theses and doctoral dissertations they are bombarded with studies of countless theories often adopting some author s theory for interpreting information about human development even when the theory does not precisely meet their needs One way to solve the problem a way especially tuned to the current classroom push for creative critical thinking is for the student to create his or her own theory Unfortunately even students as high as the doctoral level often don t understand how to create a well ordered workable theory of their own a crucial gap in their critical thinking skillsets This book is the solution to that specific problem In these pages in clear and detailed steps is a complete explanation for developing a theory The book addresses key topics such as attention to need population basic assumptions key terms causes and stages interpreting evidence and applications Author R Murray Thomas a well known and highly respected elder in the social sciences also details five illustrative theories covering their history and providing insights about how they were developed This work will be valuable to students of psychology human development child development and theory as well as those in other disciplines seeking an understanding of theory building

Value Presuppositions in Theories of Human Development Leonard Cirillo,Seymour Wapner,2014-06-03 First published in 1986 The chapters and discussions presented in this volume derive from the conference Value presuppositions in theories of human development sponsored by the Heinz Werner Institute Clark

University on June 10 11 1983 The conference included both psychologists and philosophers and mainly concerned those assumptions about what ought to be that enter into the ways that investigators in the human sciences construe development

Psychology and Social Policy Prof. Dr. Bilal Semih Bozdemir, Moreover economic structures have direct implications on the labor market which subsequently affects individual decision making related to employment career pathways and lifestyle choices In an economy with high unemployment rates or limited job opportunities individuals may confront challenges in pursuing their preferred career trajectories To mitigate these challenges they may adjust their expectations or settle for roles that do not align with their aspirations Decreased economic mobility often results in a host of behavioral adjustments including risk aversion which diminishes the willingness to invest in education or entrepreneurial ventures Another salient aspect is the role of socio economic status which is deeply intertwined with economic structures Individuals from disadvantaged economic backgrounds may not only face constraints in accessing educational and professional opportunities but may also adopt behavioral patterns that reflect their economic realities For instance people in lower socio economic strata may prioritize immediate financial needs over long term investments such as saving or education Thus decision making becomes a reflection of their situational constraints rather than an outcome of purely rational choice In understanding the relationship between economic structures and individual decision making it is crucial to consider the impact of government policies and regulations Economic policy decisions including taxation welfare provisions and labor regulations create a framework that defines the choices available to individuals For instance policies that promote entrepreneurship and innovation can enhance individual agency by providing the necessary resources and support Conversely restrictive policies may hinder individuals from pursuing certain opportunities or ambitions

Exploring Developmental Theories Frances Degen Horowitz, 2014-02-25 Through the evaluation and integration of developmental theories this volume proposes a new structural behavioral model of development Dr Horowitz s model helps account for both the behavioral development of children with extensions across the life span and for the universal and non universal characteristics in human behavioral development Exploring Developmental Theories also sheds a new and different light on the nature nurture or heredity environment controversy and on the topic of continuity and discontinuity in development Exploring Developmental Theories examines the concepts of stage structure and systems organismic theory and general system theory analyzes open and closed systems as well as organismic and mechanistic world views integrates the concepts associated with organismic and mechanist world views examines learning mechanisms and processes that foster the acquisition of behavior and discusses the strengths and weaknesses of Gessel Piaget and behaviorism in accounting for behavioral development
