

WHAT IS IMPERIALISM?

Imperialism is when a country expands its influence and power into other areas through colonization, military force, or other means. It's about a stronger country taking control over weaker ones, often to access resources, labor, and markets or to extend its military reach.

Theories Of Imperialism:

Theories of Imperialism Wolfgang J. Mommsen, 1982-03-15 In recent years the discussion of imperialism has become so compartmentalized that it is difficult for somebody who is not directly involved to put the often polemical discussion and the various scientific and political positions forward into a relevant context Mommsen's survey is an excellent guide German Studies on the German edition *Theories of Imperialism* is the most succinct fairest and most sophisticated statement I have seen of the range of theories of imperialism Each set of theorists is come at in their own terms described fairly and summarized fully The book is objective readable and short Robin W Winks Yale University

Marxist Theories of Imperialism Murray Noonan, 2017-02-28 For Marxists imperialism is the highest stage of capitalism Critical analysis of imperialism has been a feature of Marxist throughout the twentieth century The conceptualising and theorising of imperialism by Marxists has evolved over time in response to developments in the global capitalist economy and in international politics Murray Noonan here provides the first complete analysis of Marxist theories of imperialism in over two decades Presenting three phases of imperialist theories he analyses and compares Classical Neo and Globalisation era Marxist theories of imperialism The book moves chronologically tracking the origins of imperialism theorised by J A Hobson at the beginning of the twentieth century up to the present day He critically identifies and engages with a new Globalisation era phase of Marxist imperialism theory Through a detailed scholarly analysis of the history and evolution of these theories Noonan offers vital new perspectives on imperialist theory and its relevance and application in the twenty first century

Marxist Theories of Imperialism Anthony Brewer, 1980 The last two hundred years have seen a massive increase in the size of the world economy and equally massive inequalities of wealth and power between different parts of the world They have also witnessed the rise to dominance of the capitalist mode of production Marxists from Marx himself through to present day thinkers have argued that these changes are profoundly interconnected This book offers a unique account of Marxist theories of Imperialism It has been fully updated and expanded to cover all the developments since its initial publication and will be essential reading for any student of Marxism

Theories of Imperialism (Routledge Revivals) Norman Etherington, 2014-07-11 First published in 1984 this study examines closely the shifting attitudes towards and theories concerning imperialism from the colonial wars of the late nineteenth century to America's involvement in Vietnam This lucid investigation encompasses the World Wars the disintegration of the Colonies and the Cold War It also gives fascinating insight into the theories of imperialism advocated by such diverse writers as Hobson Wilshire Angell Brailsford Luxemburg and Lenin Throughout the author objectively evaluates the theory that capitalism is a cause of aggression a fundamental tenet of anti imperialist writers It is Norman Etherington's contention that further investigations into the sources causes and effects of imperialism can only take place if the various theories concerning it are analysed A fascinating and detailed study this reissue will be of particular value to students interested in the theories and history of imperialism

Marxist Theories of Imperialism Tony Brewer, 2002-09-11 The last two hundred years have seen a massive increase in the size of the world economy and equally massive inequalities of wealth and power between different parts of the world They have also witnessed the rise to dominance of the capitalist mode of production Marxists from Marx himself through to present day thinkers have argued that these changes are profoundly interconnected This book offers a unique account of Marxist theories of Imperialism It has been fully updated and expanded to cover all the developments since its initial publication and will be essential reading for any student of Marxism

Studies in the Theory of Imperialism Roger Owen, 1972 Compilation of conference papers on theories concerning imperialism i e Colonialism and neo colonialism or the historical and recent role of European capitalism in developing countries describes existing theories and shows how they could be made more relevant and presents case studies illustrating how such theories can be used to elucidate historical problems Annotated bibliography pp 331 to 378 references and statistical tables Conference held in Oxford 1969 1970

The Pattern of Imperialism Earle Micajah Winslow, 1948 Theories of Imperialism Wolfgang Justin Mommsen, 1980

The Theory of Capitalist Imperialism David Kenneth Fieldhouse, 1967 This series is designed to study problems in preference to periods Each volume will contain sections dealing with historiography documents and a consideration of the wider issues although the balance between the three will vary in each case This approach encourages the student to deal in his own way with the problems raised by historical documents and the historiography of the issues in question and he is made aware of the wider perspectives of history

Rethinking Imperialism J. Milios, D. Sotiropoulos, 2009-10-09 This book aims at presenting and assessing imperialism as a theoretical concept It aims to provide a comprehensive evaluation focusing specifically on the tension between Marx's theoretical system of the Critique of Political Economy and the theories of capitalist expansion and domination

The Liberal Ideal and the Demons of Empire Bernard Semmel, 1993 As Great Britain and other Western nations built empires both formal and informal writers on economic and social questions developed theories to explain why and how advanced industrial states exercised control over colonial regions Different schools of thought emerged some anticipated the growth of a cosmopolitan economic order others believed in a brutal imperialism necessary for an expanding capitalism still others saw evil precapitalist forces at work In The Liberal Ideal and the Demons of Empire noted historian Bernard Semmel traces the evolution of the ideas about imperialism and discusses four major schools of thought the classical economists the social theorists the national economists and the Marxists From Adam Smith to Lenin the subject of colonialism and then imperialism remained controversial Although classical economists offered visions of a prosperous world economy based on free trade and liberal idealists argued that rational self interest would eliminate aggressive mercantilism and wars of conquest such utopian ideals proved elusive Even defenders of capitalism noted contradictions between the harsh realities of the emerging industrial system and the optimistic economic theories that attempted to describe it In the end the critics including liberal sociologists national economists and Marxists would win the

day by defining imperialism in terms of historic demons feudal aristocrats medieval usurers and evil empires These ideas Semmel concludes became props of the liberal socialist and fascist ideologies of our time A generation ago Richard Koebner traced the changing meanings of the word imperialism from its rather surprising Napoleonic beginnings Now building on a succession of books with which he has enriched the literature Bernard Semmel addresses the wider question of the evolution in thought to which the evolution of the word was so to speak an index Semmel's book will be unquestionably useful to historians particularly those outside the confines of European expansion and will be valuable as supplemental reading in college courses One wonders if it will have the effect one would most like to see on politicians publicists and preachers who continue to use the word imperialism so inappropriately Robert K Webb University of Maryland Baltimore County Bernard Semmel is Distinguished Professor of History at the Graduate School of the City University of New York His studies of imperialism include *Imperialism and Social Reform* *Jamaican Blood and Victorian Conscience* and *The Rise of Free Trade Imperialism* He has also written on Methodism John Stuart Mill and naval strategy *Imperialism* Ronald H. Chilcote, 2000-06 The tension and disparity between developed and underdeveloped nations will be a major challenge to world stability in the twenty first century In an era of international markets and global economy it is thus important to understand the dynamic forces that have led to the development and expansion of capitalism which continues to transform society at a galloping pace The key essays in this valuable collection present different perspectives but they are all united by the fundamental premise that capitalism is at the root of both development and imperialism Editor Ronald H Chilcote has selected major contributors in the field of economic development and divided their articles into four thematic sections The first section provides a conceptualization of imperialism in the context of capitalism and a definition of the limits of imperialism elaborated by Paul Sweezy Classical theories of imperialism are then reviewed including those of J A Hobson Rudolf Hilferding Nicolai Bukharin V I Lenin Rosa Luxemburg and Joseph Schumpeter The second set of selections focuses on the relationship of imperialist theory to contemporary views of development and underdevelopment taking into account both the legacy of Marx and of Lenin The third section builds on the earlier theoretical contributions of the classical thinkers links imperialism to the underdevelopmental literature and traces the evolution of development underdevelopment theory after the Second World War The final section reminds us that some of these presumably dated theories and concerns remain current and relevant today This well designed anthology provides an excellent basis for a sophisticated understanding of current political and economic realities and the historical developments that went into their making **A Theory of Imperialism** Utsa Patnaik, Prabhat Patnaik, 2016-11-01 In *A Theory of Imperialism* economists Utsa Patnaik and Prabhat Patnaik present a new theory of the origins and mechanics of capitalism that sounds an alarm about its ongoing viability Their theory centers on trade between the core economies of the global North and the tropical and subtropical countries of the global South and considers how the Northern demand for commodities such as agricultural products and oil from the

South has perpetuated and solidified an imperialist relationship The Patnaiks explore the dynamics of this process and discuss innovations that could allow the economies of the South to achieve greater prosperity without damaging the economies of the North The result is an original theory of imperialism that brings to light the crippling limitations of neoliberal capitalism A Theory of Imperialism also includes a response by David Harvey who interprets the agrarian system differently and sees other factors affecting trade between the North and the South Their debate is one of the most provocative exchanges yet over the future of the global economy as resources grow thin populations explode and universal prosperity becomes ever more elusive *Marxist Thought on Imperialism* Charles A. Barone, 1985 First Published in 2015 Routledge is an imprint of Taylor Francis an Informa company
