Contemporary Theories of Religion

Michael Stausberg, 2009-06-19 Interest in theories of religion has never been greater. Scholars debate single theoretical approaches in different scholarly journals while the new atheists such as Richard Dawkins and Daniel Dennett criticize the whole idea of religion. For everyone eager to understand the current state of the field, *Contemporary Theories of Religion* surveys the neglected landscape in its totality. Michael Stausberg brings together leading scholars of the field to review and discuss seventeen contemporary theories of religion. As well as scholars of religion, it features anthropologists, archaeologists, classicists, evolutionary biologists, philosophers, and sociologists. Each chapter provides students with background information on the theoretician, a presentation of the theory's basic principles, an analysis of basic assumptions, and a review of previous critiques. Concluding with a section entitled *Back and Forth*, Stausberg compares the different theories and points to further avenues of discussion for the future.

Religion, Theory, Critique

Richard King, 2017-07-18 *Religion Theory Critique* is an essential tool for learning about theory and method in the study of religion. Leading experts engage with contemporary and classical theories as well as non-Western cultural contexts. Unlike other collections, this anthology emphasizes the dynamic relationship between religion as an object of study and different methodological approaches and openly addresses the question of the manifold ways in which religion, secular, and culture are imagined within different disciplinary horizons. This volume is the first textbook which seeks to engage discussion of classical approaches with contemporary cultural and critical theories. Contributors write on the influence of the natural sciences in the study of religion, the role of European Christianity in modeling theories of religion, religious experience and the interface with cognitive science, the structure and function of religious language, the social scientific study of religion, ritual in religion, the phenomenology of religion, critical theory and religion, embodiment and religion, the impact of colonialism and modernity, theorizing religion in terms of race and ethnicity, links among religion, nationalism and globalization, the interplay of gender, sex, and religion, and religion and the environment. Each chapter introduces the topic, identifies key theorists, and respects the pluralistic nature of the scholarship in the field. Altogether, this collection scrutinizes the explicit and implicit assumptions theorists make about religion as an object of analysis.

Religion

James Thrower, 2019-08-08 *What is Religion?* This is the first text to review in a single volume the theories of religion which have been put forward by both believers and non-believers. Why theories of religion? After raising and answering this question, the author begins his examination of theories of religion by first looking at the explanations given by religious believers: Revelation and Religious Experience. He then considers the views of thinkers who have sought to transform religion into philosophy: Plato, Kant, and Hegel, before reviewing the theories of those who have seen religion as arising out of errors in primitive thinking: Tylor, Frazer, and Lévy-Bruhl, and those masters of suspicion as Paul Ricoeur has

called them Feuerbach Nietzsche Marx and Freud who offered what they believed to be exhaustive psychological and sociological theories of the origin and nature of religion In the course of his discussion the author also engages with many contemporary thinkers whose discussions of religion have been based on these classical accounts In a brief conclusion the author tries to assess the future of the religions of the world in light of the increasingly close inter religious encounters that are becoming a feature of the global village of the twenty first century Key Features Comprehensive survey of the field Theories will be considered against the phenomenon of religion world wide Theories offered in a way that lets the student make up his or her own mind

Psychological Theories of Religion James Forsyth, 2003 This book surveys the major theorists in the psychology of religion Sigmund Freud C G Jung William James Erich Fromm Gordon Allport Abraham Maslow and Viktor Frankl who are all seminal thinkers and represent the classical theories in this field Each of these theorists presents a more or less comprehensive theory of religion which attempts to give an account of the psychological origin and or value of religion The approach of the book in each case shows how the theory of religion emerges not only from the theorist s psychological theory but also from his own life experience Each chapter contains an introductory overview of the theory biographical material on the theorist his theory of personality his theory of religion and an evaluation of the theory of religion This consistent chapter format discusses the theorist s influence on the field points out some developments from and reactions to the theory and raises certain questions in order to stimulate readers own critical responses For individuals who want to view and better understand religion from the psychological perspective

Group Theories of Religion and the Individual Clement C J Webb, 2023-07-18 Clement C J Webb argues that group theories of religion as opposed to individual theories provide a more nuanced and accurate understanding of religion s role in society This book is a must read for anyone interested in the intersection of religion and sociology This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

21st Century Theories of Religion Michael Stausberg, 2024-11-08 What is religion and how does it originate What are its functions and how does it work These are some of the key questions addressed by theories of religion Far from being a past concern a series of new answers have been proposed since the beginning of our present millennium by evolutionary biologists and psychologists philosophers sociologists and scholars of religion In *21st Century Theories of Religion* Michael Stausberg is joined by leading scholars from Europe and North America to present and critically discuss fifteen contemporary theories Contributions introduce the theoreticians unpack their arguments review their reception and engage in critical debates The

Ten Theories of Religion Daniel Pals, **Religion** Seth Daniel Kunin, 2003 Over the course of the twentieth century the way we understand the religious experience has been transformed Various thinkers and intellectual approaches have shaped the ways in which scholars examine rituals symbols and belief systems In **Being Religious** Mladen Turk, 2013-07-12 What makes us religious What is religion This book presents relevant research and theoretical proposals for evolutionary theories of religion and socially and ecologically adaptive theories of religion Most attempts to study religious behaviors through evolutionary biology and related disciplines are still very fragmentary Mladen Turk brings those theoretical approaches in dialogue with religious studies and theology through interpretation and critique that centers on revealing hidden theological assumptions and interpreting theoretical leaps of those approaches to religion In **Being Religious** Turk expounds understanding of religion as a complex interplay of various capacities arising from and influencing our biological and cultural makeup Our religious behaviors can influence our relationship towards each other and towards our environment in significant ways He shows how some aspects of complex religious behaviors can be understood better in light of human cognition and evolutionary biology At the same time he interprets this knowledge as being preliminary and at times inadequate in its claims of completeness and exhaustiveness because religious behaviors are niched within other religious behaviors and dependent on factors that various mono causal theoretical approaches cannot fully conceptualize
