Theory of Computation IntroBooks,2018-02-22 Theory of computation is seen as a branch of both theoretical computer science and modern mathematics however it also contains

some concepts from pure mathematics Theory of computation shows how one can effectively solve a problem using a computational model A number of computational models are described in theory of computation Algorithm is most common format of computational model Algorithm is a logical systematic presentation of the process of problem solution It theoretically represents the procedure of solving a particular problem Flowchart is another form of such model of computation Simply flowchart is a graphical representation of any algorithm using various symbols Each symbol of flowchart represents a particular action Algorithms and flowcharts possess a strong relation among each other Yet theory of computation talks more deeply and descriptively about algorithms and less about flowcharts
