

# 1 John Berger, *Ways of Seeing*

## INTRODUCTION

Published in 1972 and based on a BBC television programme of the same name, this is a very influential text on art criticism. Although the book and programme make the same case, they do so in slightly different ways, and the programme is well worth watching. For the photographer, the book has the advantage of putting photography in the context of western art. For the student new to critical theory, it has the advantage of being produced for a mass audience, and has as a central aim the de-mystification of art. These two points make it relatively easy to understand. A further advantage this book has is that many students have not had the opportunity to study photography, but have studied art, and so the book presents a logical progression for them when they start to study photography.

The television programme is divided into four sections and although the book is divided into seven chapters (three being made up solely of images), the book also covers four areas. The summary is of three of the four written chapters.

**Chapter 1.** In this chapter, Berger points out what is involved in seeing, and how the way we see things is determined by what we know. He goes on to argue that the real meaning of many images has been obscured by academics, changed by photographic reproduction and distorted by monetary value.

**Chapter 3.** In this chapter, Berger shows how the nude in western art systematically objectified women, and how this tradition has been continued by photography.

**Chapter 5.** Here, Berger argues that oil painting has, because of its realism, a powerful link to ownership and the buying power of money, and so often celebrates the power of money. This chapter is not summarised.

**Chapter 7.** In this chapter, Berger further develops the link between ownership and art by critically looking at modern consumerist society and 'publicity' or advertising photography.
