Chapter Vignette:

Theory and Practice

What if you went home tonight and turned on the light switch and nothing happened? Most of us would immediately start seeking a logical explanation: “Is the bulb burnt out?” “Did my roommate forget to pay the electric bill?” “Is the electricity out?” “Did a fuse blow?” These are common thoughts that would race through our minds. The order would probably depend on our past experience and we would try to determine the cause through a logical thought sequence. Attribution theory is one framework that helps us explain the world and determine the cause of an event (the light bulb not working) or behavior (why my girlfriend is mad at me). Simply put, this theory helps us make sense of events by providing a systematic method to assess and evaluate why things occur. Attribution theory is just one of many theoretical models that are useful to business researchers.
