Thereafter Johnnie:

Thereafter Johnnie Carolivia Herron, 2025-09-30 The Snowdon family is the envy of Black D C educated wealthy and accomplished John Christopher the patriarch saves lives as a heart surgeon and is revered by his students at Howard University His wife Camille manages an elegant house overlooking Rock Creek Park in the neighborhood known as the Gold Coast Here she devotes herself to reading gardening and raising their three daughters Cynthia Patricia and Eva who will attend the very best schools and are able to roam the world on a whim Theirs ought to be a story of success and empowerment but something is rotten in the house of Snowdon Years later when John Christopher s granddaughter Johnnie comes to seek the truth about her own parentage she uncovers family secrets that reflect America s original sin and look forward to an apocalyptic future By turns a poetic epic a ghost story a historical novel and a chilling dystopian fable

Thereafter Johnnie is a unique and uniquely American fusion of myth and hard bitten reality an erotic horrifying and even hopeful reckoning with hundreds of years of injustice **Black Subjects** Arlene Keizer, 2018-08-06 Writers as diverse as Carolivia Herron Charles Johnson Paule Marshall Toni Morrison and Derek Walcott have addressed the history of slavery in their literary works In this groundbreaking new book Arlene R Keizer contends that these writers theorize the nature and formation of the black subject and engage established theories of subjectivity in their fiction and drama by using slave characters and the condition of slavery as focal points In this book Keizer examines theories derived from fictional works in light of more established theories of subject formation such as psychoanalysis Althusserian interpellation performance theory and theories about the formation of postmodern subjects under late capitalism *Black Subjects* shows how African American and Caribbean writers theories of identity formation which arise from the varieties of black experience re imagined in fiction force a reconsideration of the conceptual bases of established theories of subjectivity The striking connections Keizer draws between these two bodies of theory contribute significantly to African American and Caribbean Studies literary theory and critical race and ethnic studies **Thereafter Johnnie** , *Words to Our Now* Thomas Glave, Essays regarding prejudice and inhumanity by a gay Jamaican American

Everybody's Family Romance Gillian Harkins, 2009 In the 1990s a boom in autobiographical novels and memoirs about incest emerged making incest one of the hottest topics to connect daytime TV talk shows the self help industry and the literary publishing circuit In *Everybody's Family Romance* Gillian Harkins places this proliferation of incest literature at the center of transformations in the political and economic climate of the late twentieth century Harkins s interdisciplinary approach reveals how women s narratives about incest were co opted by and yet retained resistant strains against the cultural logics of the neoliberal state Across chapters examining legal cases on recovered memory popular journalism and novels and memoirs by Dorothy Allison Carolivia Herron Kathryn Harrison and Sapphire Harkins demonstrates that incest narratives look backward into the past In these accounts images of incest forge links between U S chattel slavery and the distributive impasses of the welfare state and between decades distant childhoods

and emergent memories of the present In contrast to recent claims that incest narratives eclipse broader frameworks of political and economic power Harkins argues that their emergence exposes changing structural relations between the family and the nation and in doing so transforms the analyses of American familial sexual violence

The Lever of Riches Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
