

Time A Philosophical Analysis

L. Nathan Oaklander

Time A Philosophical Analysis:

Time: A Philosophical Analysis T. Chapman, 2012-12-06 This book is intended as an exposition of a particular theory of time in the sense of an interrelated set of attempted solutions to philosophical problems about it Generally speaking there are two views about time held by philosophers and some scientists interested in philosophical issues The first called the A theory after McTaggart's expression A determinations for the properties of being past present or future is often thought to be closer to our commonsense view of time or to the concept of time presupposed by ordinary language It includes at least the following theses a Logic ought really to include tensed quantifiers for existence on one of its important usages means present existence More generally we can't reduce all tensed locutions to tenseless ones b The distinction between past present and future is an objective one It is not for example dependent on our consciousness of change some A theorists hold also that the distinction in effect is an absolute one [A Brief History of the Philosophy of Time](#) Adrian Bardon, 2013-07-18 Its treatment is roughly chronological starting with the ancient Greek philosophers Heraclitus and Parmenides and proceeding through the history of Western philosophy and science up to the present **A Study of Time in Indian Philosophy** Anindita Niyogi Balslev, 2009-01-01 Since its first publication A Study of Time in Indian Philosophy has been acclaimed as having successfully shown the simple falsity of such clichés that the Indian view of time is cyclic or that it is exclusively illusory Given the variety of views discussed in this work it is evident that the theme of time is intimately related to such basic concepts as being and becoming change and causality creation and annihilation It has been therefore observed that this book makes an excellent introduction to the heart of Indian thought Based on Sanskrit source material this book is a unique attempt to presenting a comprehensive review of the widely divergent views about time in Indian thought Clearly written it succeeds in setting out the issues of discussion pointedly and cogently Since the concept of time intervenes with such major concepts as that of causality being and non being etc this book also serves as a general introduction to the classic heart of Indian Philosophy The author has demonstrated a rare ability to translate technical doctrines from one tradition of thought into the language of another and thus has made it possible for all those who are concerned with the question of time but do not have access in the Indian conceptual world to appreciate the contributions of Indian thought with regard to this complex question Noteworthy is the fact that this book is the first attempt which successfully exposes the simple falsity of such clichés as that the Indian view of time is cyclic as opposed to the Judaeo Christian understanding of linear time A Study of Time in Indian Philosophy therefore renders a valuable service to all those who are concerned with cross cultural and inter religious exchange **The Philosophical Analysis of Space and Time** Lewis Samuel Feuer, 1935 **Suffering Time: Philosophical, Kabbalistic, and Hasidic Reflections on Temporality** Elliot R. Wolfson, 2021-05-25 No one theory of time is pursued in these essays but a major theme that threads them together is Wolfson's signature idea of the timeswerve as a linear circularity or a circular linearity expressions that are meant to avoid the conventional split between the two temporal modalities of the line and the

circle The conception of time elicited by Wolfson from a host of philosophical and mystical sources both Jewish and non Jewish buttresses the contention that it is precisely structural invariability that engenders interpretive variation This hermeneutical axiom is justified in turn by the presumption regarding the cadence of time as the constant return of what has always been what is yet to be The telling of time wells forth from the time of telling One cannot speak of the being of time consequently except from the standpoint of the time of being nor of the time of being except from the standpoint of the being of time

Out of Time Samuel Baron,Kristie Miller,Jonathan Tallant,2022-04-14 The idea that time does not exist is for many unthinkable time must exist Almost every experience we have tells us so There has been plenty of debate around what time is like but not whether it exists The goal of this book is to make the absence of time thinkable Time might not exist Beginning with an empirically flavoured examination of the folk concept of time the book explores the implications this has for our understanding of agency and the extent to which our best physics and best metaphysics are compatible with a timeless conception of reality

The Psychology of Time and Its Philosophical Implications Carlos Montemayor,2009 This dissertation offers new proposals based on a philosophical appraisal of scientific findings to address old philosophical problems regarding our immediate acquaintance with time It focuses on two topics our capacity to determine the length of intervals and our acquaintance with the present moment A review of the relevant scientific findings concerning these topics grounds the main contributions of this dissertation Thus this study introduces to the philosophical literature an empirically adequate way to talk about how the mind represents time at the most fundamental level In order to account for our immediate acquaintance with the duration of intervals a theoretical framework for classifying clocks is used to explain why the representational outputs of the circadian clock and the stopwatch have metric structure A philosophical analysis of these outputs is proposed to classify them and explain their properties With respect to our immediate acquaintance with the present a novel two phase model of the present is proposed This model shows that there are two forms of acquaintance with the present which has consequences for contemporary debates in the philosophy of time

Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1913 An international journal of general philosophy **Philosophical works** George Berkeley, 1871 The Philosophy of Time L. Nathan Oaklander, 2008 The Philosophy of Time is a new title in the Routledge series Critical Concepts in Philosophy It meets the need for an authoritative reference work to make sense of the subject's vast literature and the continuing explosion in research output Edited by L Nathan Oaklander a leading scholar in the philosophy of time this new Major Work from Routledge brings together in four volumes the canonical and the very best cutting edge scholarship in the field to provide a synoptic view of all the key issues and current debates *History of Modern Philosophy from Nicolas of Cusa to the Present Time* Richard Falckenberg, 1893 Time and Realism Yuval Dolev, 2007-10-05 A new view of the metaphysics of time arguing that the traditional tensed/tenseless debate within analytic philosophy should be seen as the first stage in a philosophical investigation of time and that the next stage belongs to phenomenology How does time pass Does time itself move or is time's passage merely an illusion Analytic philosophers belong for the most part to one of two camps on this question the tensed camp which defends the reality of time's passage conceiving the present as ontologically privileged over the past and future and the tenseless camp which denies time's passage and holds that all events whatever their temporal location are ontologically equal In *Time and Realism* Yuval Dolev goes beyond the tensed/tenseless debate to argue that neither position is conclusive but that the debate over them should be seen as only the first stage in the philosophical investigation of time The next stage he claims belongs to phenomenology and he argues further the phenomenological analysis of time grows naturally out of the analytic enterprise Dolev shows that the two rival theories share a metaphysical presupposition that tense concerns the ontological status of things He argues that this ontological assumption is natural but untenable and that leaving it behind creates a new viewpoint from which to study central topics in the metaphysics of time Dolev shows that such a study depends on the kind of meticulous attention to our firsthand experiences that drives phenomenological investigations Thus he argues phenomenology is the venue for advancing the investigation of time *Time and Realism* not only analyzes the tensed/tenseless debate resolving some of its central difficulties along the way it transcends it It serves as a bridge between the analytic and the continental traditions in the philosophy of mind both of which are shown to be vital to the philosophical examination of time **History of modern philosophy from Nicolas of Cusa to the present time, tr. by A.C. Armstrong. 1st Amer. ed** Richard Falckenberg, 1893
