Cook, 1997-10-09 This third edition represents the further development of a highly successful clinical text which has been acclaimed internationally Two new authors bring strong additional expertise to the writing team and the unique feature of this book remains its ability to address the realities of the clinical world directly while offering an authoritative review of the research literature Extensively revised throughout of particular note are completely new chapters covering alcohol as a drug causes of excessive drinking drinking problems and the life course and a new look at both the physical complications associated with alcoholism and the organisation of treatment services The authors adeptly address the everyday needs of the clinical front line through presentations which are enlivened through personal clinical experience and illustrated by case vignette A classic text in its field this comprehensive and timely new edition will ensure its continued popularity

The Modern Treatment of Nervous and Mental Diseases William Alanson White, Smith Ely Jelliffe, 1913 This volume devoted to the treatment of nervous and mental diseases is designed to meet the needs which the rapid advances in knowledge of neurology and psychiatry have created The nervous system is here regarded as a whole and as inclusive of the mind and it is maintained that disturbances of any and all of its

functions mental as well as physical are proper subjects for therapeutics The present work lays emphasis upon the psychical side of life as being worth quite as much consideration as the physical It sets forth doctrines of nervous and mental hygiene reconstructive factors in social organization as applied to human ills and endeavors to present a broad front to the pessimistic nihilism in therapeutics that has been too long current in these fields because the doctor's eyes have been too closely focused on the individual examples and results of human accidents Neurology and psychiatry offer the widest possible opportunities for preventive medicine as well as for therapeutic optimism The program here presented is essentially therapeutic Planned as it has been on a broad scale the more practical issues confronting the clinician have nevertheless been fully met The editors have sacrificed philosophical views for more definite guideposts wherever in the present state of our knowledge such a course seemed wiser PsycINFO Database Record c 2005 APA all rights reserved **California.
