**The Treatment of War Wounds in Graeco-Roman Antiquity** Christine Salazar,2018-07-17 In this investigation of the treatment of battle trauma in antiquity treatment is used in a double sense both as actual medical treatment and literary treatment in non medical sources Part I deals with the practical medical aspects of the topic the types of wounds likely to result from a battle their surgical and pharmacological treatment the question of medical services in ancient armies medical terminology and the availability of medical knowledge Part II discusses the use of scenes of wounding and wound treatment in literature and Part III is a survey of the archaeological evidence This is the first monograph to examine the topic in all its different aspects it should be of interest to classicists medical historians and military historians The Treatment of war wounds William Williams Keen,1917 *The Early treatment of war wounds* Henry McIlree Williamson Gray,1919 The Treatment of War Wounds William Williams Keen,1917 It is and has been my feeling of course that this and many other early estimates of the Carrel Dakin method were over enthusiastic As early as 1918 I felt that the Carrel Dakin method involved too much disturbance of splints and casts in compound fractures and by 1921 I had declared against this and all other frequent dressing methods in wound infection H W Orr **The Treatment of War Wounds in Graeco-Roman Antiquity** Christine F. Salazar,2000 This volume is the first monograph to deal with the subject of battle trauma in antiquity it discusses medical and practical aspects of wound treatment war wounds as a topos in literature and the archaeological evidence

Excerpt from Wounds in War The Mechanism of Their Production and Their Treatment Probably no branch of surgery has undergone more important changes in consequence of the teachings of Lister and of Pasteur than that of gunshot wounds As antiseptic methods have in certain cases rendered possible the performance of operations on regions of the body hitherto untouched by the civil surgeon and as they have in others enabled him to avoid interference and warranted him in substituting conservative treatment for the more radical measures of earlier times so they have in the treatment of the wounded in war enabled the military surgeon to save lives and limbs the latter of which at all events would in the days of Larrey and Guthrie have been sacrificed without hesitation At the end of the last century during the Peninsular War and even in the Crimea a gunshot wound of a long bone and more especially one implicating a large joint was held to demand immediate amputation But of late years the employment of antiseptics has so revolutionised the surgery of war that no general rule of this kind is admissible for a moment and amputations for gunshots are only taken into consideration when the disorganisation of a limb is so extreme that but little of it remains to be preserved by conservative treatment and when that little is more likely to prove an encumbrance than a help to its possessor if retained by the successful issue of the system applied About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **Index-catalogue of the Library of the Surgeon General's Office, United States Army (Army Medical Library).
