Tropical Trees Found in the Caribbean, South America, Central America, Mexico Dorothy Hargreaves, Bob Hargreaves, 1965

Fruit Trees of the Caribbean Sandra Hewitt, 2005 Fruit growing in the tropical regions of the world is quite different from the more temperate areas where the majority of fruits are strictly seasonal and mostly ripen from mid Summer to late Autumn There is no off season in tropical regions and the variety of available fruits in the Caribbean has increased with the introduction of new species from other parts of the tropical world Fruits Trees of the Caribbean describes more than ninety varieties of trees and their fruits In botanical terms some fruits will be known to many people as spices such as cinnamon and cloves or parts of the fruits such as nutmeg or mace There is at least one species listed that cannot be eaten as it is poisonous The description of trees and shrubs is comprehensive but what cannot be accurately described are the rich and varied flavours that are totally unique and delicious
