## **Trees Of The Tropics:**

**Trees of the Tropics** Jennifer Cochrane,1990 Discusses tropical forests and trees of various areas of the world *The Ecology of Trees in the Tropical Rain Forest* I. M. Turner,2001-07-05 Our knowledge of the ecology of tropical rain forest trees is limited with detailed information available for perhaps only a few hundred of the many thousand of species that occur Yet a good understanding of the trees is essential to unravelling the workings of the forest itself This book aims to summarise contemporary understanding of the ecology of tropical rain forest trees The emphasis is on comparative ecology an approach that can help to identify possible adaptive trends and evolutionary constraints and which may also lead to a workable ecological classification for tree species conceptually simplifying the rain forest community and making it more amenable to analysis
