War On Waste:

Winning the War on Waste, 1981 *The Tides of Reform* Paul Charles Light, 1997-01-01 During the past fifty years the Congresses and presidents of the United States have made many efforts to improve the performance of the federal government In this book a leading expert in public management examines the most important reform statutes passed and concludes that the problem is not too little reform but too much Paul Light explains that Congress and the presidency have never decided whether they trust government and its employees to do their jobs well and so they have moved back and forth over the decades between four reform philosophies scientific management war on waste watchful eye and liberation management These four philosophies argues Light operate with different goals implementation strategies and impacts Yet reform initiatives draw on one or another of them almost at random often canceling out the potential benefits of a particular statute by passing a contradictory statute soon afterward Light shows that as the public has become increasingly distrustful of government the reform agenda has favored the war on waste and watchful eye He analyzes the consequences of these changes for the overall performance of government and offers policy recommendations for future reform approaches

Proceedings : 1975 Conference on Waste Reduction, 1975 **Non-Waste Technology and Production** Sam Stuart, 2013-10-22 Non Waste Technology and Production covers the proceedings of an international seminar organized by the Senior Advisers to ECE Governments on Environmental Problems on the Principles and Creation of Non Waste Technology and Production held in Paris on November 29 December 4 1976 The book focuses on the dynamics applications processes and methodologies involved in non waste technology including recycling and measures adopted by countries on non waste development The selection first offers information on the concepts and principles of non waste technology as well as the social aspects of the problems of non waste technology and systems analysis as a basis for the creation of non waste technology The text also provides an introduction to recycling in CTS as a means of reducing waste and methods of processing waste into secondary material resources The book then takes a look at concepts and principles of non waste technology and the adoption of eco activity as an approach to non waste technology The text surveys the application of non waste development in different countries such as Austria Belgium Federal Republic of Germany Poland the United States Yugoslavia and Sweden The manuscript also underscores the applications of non waste technology in the industrial settings and the methods of conserving raw material and energy and protecting the environment in chemical and electro chemical plating plants The book is a vital reference for readers and environmentalists interested in non waste technology **Human Resource Management in Public Service** Evan M.
