War That Changed War Aircraft:

Changing War Gary Sheffield, Peter Gray, 2013-10-24 In 1918 the British Expeditionary Force BEF played a critical role in defeating the German army and thus winning the First World War This Hundred Days campaign August to November 1918 was the greatest series of land victories in British military history 1918 also saw the creation of the Royal Air Force the world's first independent air service from the Royal Flying Corps and the Royal Naval Air Service Until recently British histories of the First World War have tended to concentrate on the earlier battles of 1916 and 1917 and often underplayed this vitally important period *Changing War* fills this significant gap in our knowledge by providing in depth examinations of key aspects of the operations of the British Army the Royal Air Force and its antecedents in the climactic year of the First World War Written by a group of established historians and emerging scholars it sheds light not only on 1918 but on the revolutionary changes in warfare that took place at that time

The Changing Face of Aerial Warfare Anthony Tucker-Jones, 2018-10-29 Can air power alone win a war That has been the question since the Second World War Air attacks failed miserably in Vietnam Operation Linebacker had little effect while bombing Hanoi just increased hatred for America yet air strikes in both Iraq and Libya helped bring about regime changes No fly zones may have worked in the Balkans but they might as well not have been there for Saddam Hussein's Iraq From the Luftwaffe's massed attack on Britain to NATO's interventions in Libya aerial warfare has changed almost beyond recognition The piston engine has been replaced by the jet and in some cases the pilot has been completely replaced by the microchip Carpet bombing is now a global positioning system and laser pinpointed strikes using precision guided munitions Whereas a bomber's greatest enemies were once fighters and flak the threats have now morphed into smart missiles from half a world away In this compelling study celebrated defence expert Anthony Tucker Jones charts the remarkable evolution of aerial warfare from 1940 to the present day
