Genetic Seeds of Warfare R. Paul Shaw, Yuwa

Wong, 2020-12-22 For millennia humanity has simultaneously deplored and waged war With each conflict the stakes have risen and we now face global annihilation for the sake of a practice all the world claims to condemn Is there some seemingly irresistible force that impels us toward our own destruction To explain this central paradox of human behaviour Genetic Seeds of Warfare originally published in 1989 advances a startling new theory It traces the origins of warfare back to early groups of Homo sapiens in competition for scarce resources showing that warfare evolved as these groups evolved kin group against kin group tribe against tribe nation against nation Rather than being tied to a specific gene warfare emerged as one of many behavioural strategies for maximising genetic survival As social groups became more complex motivations for warfare developed from simple protection of blood relations to political appeals to shared ethnicity religion and national identity But the ultimate cause of warfare is rooted in the most basic of human drives the need to ensure that one's genes will survive and reproduce The authors challenge many assumptions about human behaviour in general and warfare in particular They convincingly present the case for an evolutionary understanding of the propensity for warfare supporting their argument with data from a vast array of social and natural science research In doing so they reveal why previous attempts at ending war have failed and make proactive suggestions toward the development of a new agenda for world peace

From Every People and Nation David M. Rhoads, A diverse group of New Testament scholars and theologians offer myriad paths to a better understanding of the Book of Revelation They discuss topics such as Hispanic Cuban American and African American perspectives ecological issues postcolonial themes and liberation theology The book also provides a set of guidelines for intercultural Bible study The volume's contributors include Brian K Blount Justo Gonzalez Harry O Maier Clarice J Martin James Okoye Tina Pippin Pablo Richard Barbara R Rossing Victor Westhelle Khiok Khng Yeo
