**Modern Warships** Kit Bonner, Carolyn Bonner, 2007      **French Warships in the Age of Steam 1859-1914** Stephen S. Roberts, 2021-10-31 This outstanding book will be essential for future studies of naval policy in the period between la Gloire and the Great War The Naval Review This book is the first comprehensive listing in English of more than 1400 warships that were added to the official French navy fleet list between 1 January 1859 and World War I It includes everything from the largest battleships to a small armoured gunboat that looked like a floating egg Reflecting the main phases of naval policy the ships are listed in three separate parts to keep contemporary designs together and then by ship type and class For each class the book provides a design history explaining why the ships were built substantial technical characteristics for the ships as completed and after major reconstructions and selected career milestones including the ultimate fate of each ship Following the earlier volumes written jointly with Rif Winfield French Warships in the Age of Sail 1626 1786 and French Warships in the Age of Sail 1786 1861 this trilogy now provides a complete picture of the development of French warships over a period of almost three centuries As a technical reference on the French ships of 1859 to 1914 this book is a must for the serious naval architecture student modeler or enthusiast So much solid information is packed in this book arranged logically clearly and with so many illustrations I cannot see where another volume on this subject can compete Highly recommended Nautical Research Journal Superlatives abound in describing this book arguably the finest naval shiplist ever created Warship International      **British Warship Losses in the Modern Era** David Hepper, 2022-07-31 This important new reference work details all those ships and vessels of the Royal Navy large and small which were lost by accident or enemy action during the twentieth century from the end of the First World War to the last years of the century In all the fates of over 2 000 ships and small craft are covered from aircraft carriers and battleships to motor launches harbour tenders and tugs Those vessels hired or purchased for wartime service such as trawlers paddle steamers and yachts are also listed During wartime ships are lost it is their purpose to go in harm s way Hostile gunfire torpedoes and mines were established threats throughout the period while the increasing threat of air attack and the introduction of weapons employing new technology such as influence triggered mines homing torpedoes or air launched guided weapons added to the risks of operating in a hostile environment Ships operating in extremely hazardous conditions such as at Dunkirk in 1940 or Singapore in 1942 suffered heavy losses in brief concentrated conflicts but the long continuous campaigns such as the Atlantic convoys or the constant need to sweep for mines also took their toll Peacetime losses are dominated by submarine casualties demonstrating the dangerous character of that service To this may be added the hazardous nature of the sea itself when ships are lost in heavy weather sometimes human error or plain foolishness may play a part The core of the book is taken up by those losses experienced during the Second World War but peacetime losses and more recent conflicts such as the Falklands War of 1982 are included Arranged chronologically every entry notes the outline details of the vessel identifies the Commanding Officer

where known and gives a full and often harrowing account of the circumstances of the loss and the number of casualties The details come from extensive original research using primary source material wherever possible particularly the relevant War Diaries and the collected loss and damage reports casualty reports and reports of proceedings now in the National Archives Wartime losses of the Dominions are included to ensure completeness This comprehensive record of warship losses from all causes suffered by the Royal Navy over the past one hundred years is the first single volume work on the subject and represents a major milestone in naval research and publishing

HMS Cavalier Destroyer 1944 Richard Johnstone-Bryden,2015-07-30 HMS Cavalier is a C Class destroyer one of 96 War Emergency Programme destroyers that were ordered between 1940 and 1942 She saw action on convoy duty off Russia and later in 1945 was sent to the Far East where she provided naval gunfire support during the battle of Surabaya She continued with the British Pacific Fleet until May 1946 Now designated as a war memorial to the 142 RN destroyers and 11 000 men lost during WWII she is on display at Chatham Historic Dockyard As is the case for many museum ships there is a surprising shortage of informative and well illustrated guides for reference during a visit or for research by enthusiasts ship modellers naval buffs historians or students This book in the Seaforth Historic Ship series redresses the gap Containing more than 200 specially commissioned photographs the book takes the reader on a superbly illustrated tour of the ship from bow to stern and deck by deck Significant parts of the vessel for example the gun turrets and engine rooms are given detailed coverage both in words and pictures so that the reader has at hand the most complete visual record and explanation of the ship that exists In addition the importance of the ship both in her own time and now as a museum vessel is explained No other book offers such superb visual impact nor brings the ship so vividly to life
