Weather Rage:

Weather Rage Ross Reynolds, 2003-02-13 Some atmospheric disturbances produce the kind of extreme weather events making the national and international news headlines on a regular basis. Just about everyone is interested in knowing more about hurricanes, typhoons, and tornadoes. There is often confusion about whether or not they are the same thing and whether, for example, we can control these extremely violent phenomena. Thunder and lightning affect many people, but how many of us understand what generates such massive electrical discharges and why they occur more at some times of year than at others. A popular addition to the Science Spectra Series, *Weather Rage* explains the origin and nature of different types of weather observed across many areas of the world and those that occur on different scales. Presenting an in-depth look at the main factors underlying weather, this book will be an extremely useful guide for all meteorology students and practitioners as well as a source of reference for all those with an interest in the weather.

The Weather's Wrath-03 Ade Paul, 2008-04 Two scientists from Antarctica, New Zealand, detect extreme thinning of the ozone. O₃. The world leaders find out they are being held to ransom by a billionaire megalomaniac, Mr. Spratton, and his corporation, who purposefully destroyed the ozone layer, creating dangerously high concentrations of deadly ultraviolet rays to bombard terra firma. The entire globe's ozone depletion causes the weather to react ferociously. Mr. Spratton stole top secret gamma radiation deflectors from the United States Army and adapted them into ultraviolet deflectors to protect those countries willing to pay his rental contracts. He then begins his quest to extort countries to make him the most powerful man on earth. The kiwi scientist who initially found the problem, Dr. Jason Rhodes, is invited to NASA to help design a plan to stop the fatal and treacherous weather that has paralyzed the civilized world, making her crumble to a state of simple survival for those scrambling to stay alive while the high pressure stakes between the United Nations and TT Corporation try to outwit each other.
