Rudyard Kipling, 1903 **The Sociology of Religion** George Lundskow, 2008-06-10 Most Sociology of Religion texts are decidedly staid and uninteresting covering contemporary developments which are only contemporary only from a disciplinary perspective They are not contemporary if viewed from the perspective of the religion's practitioners in religious and non religious settings The textbooks that attempt to be interesting to undergraduate students often fall short because they either try to cover too much in an encyclopedic format or sacrifice a sociological perspective for a personal one Many use real life examples only superficially to illustrate concepts Lundskow's approach is the opposite students will learn the facts of religion in its great diversity all the most interesting and compelling beliefs and practices and then learn relevant concepts that can be used to explain empirical observations The book thus follows the logic of actual research investigate and then analyze rather than approaching concepts with no real bearing on how religion is experienced in society This approach using provocative examples and with an eye toward the historical and theoretical not to mention global experience of religion will make this book a success in the classroom The author envisions a substantive approach that examines religion as it actually exists in all its forms including belief ritual daily living identity institutions social movements social control and social change Within these broad categories the book will devote particular chapters to important historical moments and movements leaders and various individual religions that have shaped the contemporary form and effect of religion in the world today

The Era of Industrial Growth and Foreign Expansion Kathy Sammis, 2000 Reproducible student activities cover colonial experiences including interaction with Native Americans family and social life the beginnings of slavery and the seeds democracy **Shadowing the White Man's Burden** Gretchen Murphy, 2010-05-03 During the height of 19th century imperialism Rudyard Kipling published his poem The white man's burden While some of his American readers argued that the poem served as justification for imperialist practices others saw Kipling's satirical talents at work and read it as condemnation The author explores this tension embedded in the notion of the white man's burden to create a historical frame for understanding race and literature in America She maintains that literature symptomized and channeled anxiety about the racial components of the U S world mission while also providing a potentially powerful medium for multiethnic authors interested in redrawing global color lines She identifies a common theme in the writings of African Asian and Native American authors who exploited anxiety about race and national identity through narratives about a multiracial U S empire
