American Dream, 1790-1935 Susan Nance,2009-06-01 Americans have always shown a fascination with the people
customs and legends of the East witness the popularity of the stories of the Arabian Nights the performances of Arab belly
dancers and acrobats the feats of turban wearing vaudeville magicians and even the antics of fez topped Shriners In this
captivating volume Susan Nance provides a social and cultural history of this highly popular genre of Easternized
performance in America up to the Great Depression According to Nance these traditions reveal how a broad spectrum of
Americans including recent immigrants and impersonators behaved as producers and consumers in a rapidly developing
capitalist economy In admiration of the Arabian Nights people creatively reenacted Eastern life but these performances were
also demonstrations of Americans own identities Nance argues The story of Aladdin made suddenly rich by rubbing an old
lamp stood as a particularly apt metaphor for how consumer capitalism might benefit each person The leisure abundance and
contentment that many imagined were typical of Eastern life were the same characteristics used to define the American
dream The recent success of Disney s Aladdin movies suggests that many Americans still welcome an interpretation of the
East as a site of incredible riches romance and happy endings This abundantly illustrated account is the first by a historian to
explain why and how so many Americans sought out such cultural engagement with the Eastern world long before
