Soft Computing New Trends And Applications:

Soft Computing Luigi Fortuna, Gianguido Rizzotto, Mario Lavorgna, Giuseppe Nunnari, Maria Gabriella Xibilia, Riccardo Caponetto, 2012-12-06 In the last decade new artificial intelligence methods for the modelling and control of complex systems namely neural networks fuzzy logic and probabilistic reasoning have drawn the interest of researchers and engineers Recently the advantages achievable by using combinations of these methods which have independent origin and evolution have been pointed out generating a new paradigm which is now termed soft computing This new methodology subsumes the capabilities of neural networks for modelling non linear systems and for solving classification problems the power of fuzzy logic to represent approximate or heuristic reasoning and the large capabilities of evolutionary computation for problem optimisation The book presents a clear understanding of a new type of computation system the cellular neural network CNN which has been successfully applied to the solution of many heavy computation problems mainly in the fields of image processing and complex partial differential equations CNNs computation based systems represent new opportunities for improving the soft computation toolbox The application of soft computing to complex systems and in particular to chaotic systems with the generation of chaotic dynamics by using CNN is also described These aspects are of particular interest owing to their growing interest for research and application purposes Specific topics covered in the text include fuzzy logic control and neural networks artificial neural networks and their application in the modelling and control of dynamical systems evolutionary optimisation algorithms complex dynamics and cellular neural networks applications in urban traffic noise monitoring robot control and rapid thermal process systems

Soft Computing L. Fortuna, G. Rizzotto, M. Lavorgna, G. Nunnari, M. G. Xibilia, Riccardo Caponetto, 2012-03-26 The book presents a clear understanding of a new type of computation system the Cellular Neural Network CNN which has been successfully applied to the solution of many heavy computation problems mainly in the fields of image processing and complex partial differential equations The text describes how CNN will improve the soft computation toolbox and examines the many applications of soft computing to complex systems

Methodologies For The Conception, Design And Application Of Soft Computing - Proceedings Of The 5th International Conference On Soft Computing And Information/Intelligent Systems (In 2 Volumes) Gen Matsumoto, Takeshi Yamakawa, 1998-08-25 Soft computing is the common name for a certain form of natural information processing that has its original form in biology especially in the function of human brain It is a discipline rooted in a group of technologies such as fuzzy logic neural networks chaos genetic algorithms probabilistic reasoning and learning algorithms Today soft computing has become an acknowledged concept however for a long time such components of soft computing have been debated and individually developed Since its beginning in 1990 the series of IIZUKA conferences has covered various kinds of technologies that constitute soft computing This series has played a pioneering role in promoting the development of a symbiotic relationship between the various technologies of soft computing At IIZUKA 98 the 5th International Conference on Soft Computing and Information Intelligent Systems new developments and results in this field were introduced and discussed by researchers from academic governmental and industrial institutions around the world This volume presents the opening lecture by Prof Walter J Freeman the keynote speech by Dr Gen Matsumoto the plenary lectures by 5 eminent researchers and about 230 carefully selected papers drawn from more than 25 countries It documents current research and in depth studies on the fundamental aspects of soft computing and their practical applications

Soft Computing in Management and Business Economics Anna M. Gil-Lafuente, Jaime Gil-Lafuente, José M. Merigó-Lindahl, 2012-07-13 This book is a collection of selected papers presented at the Annual Meeting of the European Academy of Management and Business Economics AEDEM held at the Faculty of Economics and Business of the University of Barcelona 05 07 June 2012 This edition of the conference has been presented with the slogan Creating new opportunities in an uncertain environment There are different ways for assessing uncertainty in management but this book mainly focused on soft computing theories and their role in assessing uncertainty in a complex world The present book gives a comprehensive overview of general management topics and discusses some of the most recent developments in all the areas of business and management including management marketing business statistics
