## **The Software Factory Managing Software Development And Maintenance:**

The Software Factory James R. Johnson,1991      **Software Factory: Managing Software Development & Maintenance** James R. Johnson,1991      **Managing a software factory** C.W. Kranenburg.,2008      Towards a Software Factory M. Van Genuchten,2012-12-06

The subject of this book is the control of software engineering The rapidly increasing demand for software is accompanied by a growth in the number of products on the market as well as their size and complexity Our ability to control software engineering is hardly keeping pace with this growth As a result software projects are often late software products sometimes lack the required quality and the productivity improvements achieved by software engineering are insufficient to keep up with the demand This book describes ways to improve software engineering control It argues that this should be expanded to include control of the development maintenance and reuse of software thus making it possible to apply many of the ideas and concepts that originate in production control and quality control The book is based on research and experience accumulated over a number of years During this period I had two employers Eindhoven University of Technology and Philips Electronics Research is not a one man activity and I would like to thank the following persons for their contributions to the successful completion of this project First and foremost my Ph D advisers Theo Bemelmans Hans van Vliet and Fred Heemstra whose insights and experience proved invaluable at every stage Many thanks are also due to Rob Kusters and Fred Heemstra for their patience in listening to my sometimes wild ideas and for being such excellent colleagues

The Software Factory James R. Johnson,1991      *The Software Factory Challenge* Herbert Weber,1997

The Eureka Software Factory project ESF was set up by a Group of European partners in 1987 Its objective was broadly to improve the large scale software production process by introducing an industrialised approach to have The Software Factory Challenge social organisational and technical aspects The project was set up under the pan European Eureka programme and it was funded by the partners together with their national governments This book is not a history of the ESF project but rather a presentation of its main ideas and achievements and an account of how the concepts pioneered by the project have become part of a general movement in both the industrial and academic domains In this movement the facility for the production use and maintenance of large scale computer artefacts the Software Factory is treated in a wide and organic way so as to include concepts such as business value and process improvement with the development of new technologies being driven by these new wide requirements This new approach is in contrast with a narrowly technological one in which individual tasks like programming are aided by machines but in which the production process as a whole is not supported The main body of the book is divided into four Parts Part I gives a short overview of the ESF project and its ideas and goes on to attempt to place the ESF work in the context of industry as a whole with reference to both producers and users of Information Technology systems Part II sets out to explain the technological basis of the Software Factory as seen by ESF and goes on to describe some experimental and pioneering implementations of Factory Support Environments and their

constituents Part III is devoted to the most complete implementation of an ESF Factory Support Environment to date Kernel 2r This Section provides a highly detailed discussion of both design and implementation issues In Part IV addresses what deployment strategies are now available to continue the spread of these ideas in order to meet the goal of better software based systems i e systems which are safer more economical to build more easily changed and more useful than those that have been built up to now Finally a Glossary of Terms and a list of References is given Readers those who have a professional interest in Information Technology
