Marketing U. S. Organic Foods Carolyn Dimitri, 2010-02 Organic foods occupy prominent shelf space in the produce and dairy aisles of most U S food retailers Retail sales of organic foods increased to 21.1 billion in 2008 from 3.6 billion in 1997 This increase has been spearheaded by an expanding number of retailers are selling a wider variety of foods the development of private label product lines by many supermarkets and the widespread intro of new products Organic handlers who purchase products from farmers and often supply them to retailers sell more organic products to conventional retailers and club stores than ever before But organic farms have struggled at times to produce sufficient supply to keep up with the growth in demand leading to periodic shortages of organic products

Illus *Marketing Trends for Organic Food in the 21st Century* George Baourakis, 2004 The marketing of organic products is viewed as a significant link between the production side of the business and the consumers thereby facilitating the distribution of these relatively new products It has become obvious that companies can organize organic production and influence consumers purchasing behaviour through the employment of appropriate marketing strategies This book explores the marketing trends for organic food products through the analysis of those elements that contribute to the expansion of the organic product market It will aid marketers in facing the challenges that the organic food sector will encounter in the future
