### **Advanced Planning in Fresh Food**

**Industries** Matthias Lütke Entrup, 2005-07-15 Production planning in fresh food industries is a challenging task. Although modern Advanced Planning and Scheduling APS systems could provide significant support, APS implementation numbers in these industries remain low. Therefore, based on an in-depth analysis of three sample fresh food industries: dairy, fresh, and processed meat, the author evaluates what APS systems should offer in order to effectively support production planning and how the leading systems currently handle the most distinguishing characteristic of fresh food industries: the short product shelf life. Starting from the identified weaknesses, customized software solutions for each of the sample industries are proposed that allow to optimize the production of fresh foods with respect to shelf life. The book thereby offers valuable insights not only to researchers but also to software providers of APS systems and professionals from fresh food industries.

**Characteristic Based Planning with mySAP SCMTM** Jörg Thomas Dickersbach, 2005-06-24 Explains processes and scenarios, process chains for planning with SAP characteristics. Uses the latest releases of SAP R/3 and APO Advanced Planning Optimization software. The levels, scenario process, and function are explained from the business case down to the implementation level, and the relations between these levels are consistently pointed out throughout the book. Many illustrations help to understand the interdependencies between scenario process and function. Aims to help avoid costly dead ends and securing a smooth implementation and management of supply chains.
