with shell lengths of 10 18 inches and weights ranging from 10 35 pounds though some can grow larger in captivity They are more active hunters using a combination of ambush and active foraging to obtain prey such as fish insects amphibians and plants 2 Alligator snapping turtle *Macrochelys temminckii* Alligator snapping turtles live mostly in the southeastern United States where they prefer slow moving rivers lakes and swamps They are substantially larger with some individuals weighing up to 200 pounds with shells measuring 26 inches or more This species is known for its striking spiked shell and a peculiar pink worm like appendage in its mouth that it employs as a bait to entice prey These turtles are more passive hunters resting stationary on river or lake bottoms with their jaws open to catch fish Because of its size food needs and habitat requirements the alligator snapping turtle is regarded more difficult to care for as a pet **New York Magazine** ,1986-05-05 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea *Great Artists* Octopus Publishing Group,2001-09 *Snapping Turtle as Pet* ERIC.
