Soccer Robotics:

Soccer Robotics Jong-Hwan Kim, Dong-Han Kim, Yong-Jae Kim, Kiam Tian Seow, 2004-06-15 This monograph is a comprehensive introduction to the field of soccer robotics. Soccer robotics has become an important research area integrating mechatronics, computer science, and artificial intelligence techniques to create real-world autonomous systems. It also serves as a popular test arena in which to compare the different approaches in diverse types of competition and with varying levels of distributed perception and collaboration. The focus of this monograph is the FIRA framework of Soccer Robotics, in particular MiroSot, which uses a central overhead camera to overview the whole soccer field and a central control of the robots. Soccer Robotics completely describes the different requirements to create a soccer team and details the hardware aspects, the computer vision needed, navigation, action selection, basic skills, and game strategy. These aspects are described at an undergraduate level, resulting in a book not only useful as a text for courses but also indispensable for everyone who wants to participate in MiroSot robotics.

RoboCup-97: Robot Soccer World Cup I Hiroaki Kitano, 2014-03-12 RoboCup is an international initiative devoted to advancing the state of the art in artificial intelligence and robotics. The ultimate long-range goal is to build a team of robot soccer players that can beat a human World Cup champion team. This is the first book devoted to RoboCup. It opens with an overview section presenting the history of this young initiative, motivation, the overall perspectives and challenges, and a survey of the state of the art in the area. The technical paper section presents the state of the art of the interdisciplinary research and development efforts in details, essentially building on the progress achieved during the RoboCup 97 Workshop. The team description contributions discuss technical and strategic aspects of the work of the participating teams.

RoboCup-99: Robot Soccer World Cup III Manuela Veloso, Enrico Pagello, Hiroaki Kitano, 2000-08-16 This book is the third official archival publication devoted to RoboCup and documents the achievements presented at the Third Robot World Cup Soccer Games and Conferences Robo Cup 99 held in Stockholm, Sweden, in July-August 1999. The book presents the following parts: Introductory overview and survey; Research papers of the champion teams and scientific award winners; Technical papers presented at the RoboCup 99 Workshop; Team description of a large number of participating teams. This book is mandatory reading for the rapidly growing RoboCup community as well as a valuable source or reference and inspiration for R/D professionals interested in multi-agent systems, distributed artificial intelligence, and intelligent robotics.

The Robot Soccer Championship Shu Chen Hou, 2024-09-18 Get ready for the most electrifying soccer tournament of the century! Tim, a young robotics enthusiast, and his team of mechanical friends are about to take the field in the grand Robot Soccer Championship. With their advanced skills, cutting-edge technology, and unbeatable teamwork, Tim and his robot squad are set to show the world what they can do. But the competition is fierce, and they'll need to solve tough challenges, outsmart rival teams, and prove that when it comes to soccer, it's all about playing together. This thrilling adventure teaches kids the value of teamwork, innovation, and friendship while introducing them to the world of

robotics and the excitement of soccer Will Tim and his robots bring home the trophy or will their dreams be dashed on the field Join the team and find out in this heart pounding journey of sports technology and determination

Weitzenfeld, Changjiu Zhou, 2009-06-24 The 12th annual RoboCup International Symposium was held during July 15-18, 2008 in conjunction with RoboCup 2008 Competitions and Demonstrations. The symposium represents the core meeting for the presentation and discussion of scientific contributions in diverse areas related to the main threads within RoboCup Soccer, RoboCup Rescue, RoboCup Home, and RoboCup Junior. Its scope encompassed but was not restricted to research and education activities within the fields of artificial intelligence and robotics. A fundamental aspect of RoboCup is promoting science and technology among young students and researchers in addition to providing a forum for discussion and excitement about Robotics with practitioners from all over the world. Since its first edition in 1997 in Nagoya, the RoboCup Competitions and Symposium have attracted an increasing number of researchers and students from all the world and today it is a major event in robotics worldwide. Due to its interdisciplinary nature and the exploration of various and intimate connections of theory and practice across a wide spectrum of different fields, the symposium offered an excellent opportunity to introduce new techniques to various scientific disciplines. The experimental, interactive, and benchmark character of the RoboCup initiative created the opportunity to present, learn, and evaluate novel ideas and approaches with significant potential. If promising, they are then rapidly adopted and field tested by a large and still strongly growing community.

Intelligent Autonomous Robotics Peter Stone, 2022-05-31 Robotics technology has recently advanced to the point of being widely accessible for relatively low budget research as well as for graduate, undergraduate, and even secondary and primary school education. This lecture provides an example of how to productively use a cutting edge advanced robotics platform for education and research by providing a detailed case study with the Sony AIBO robot, a vision-based legged robot. The case study used for this lecture is the UT Austin Villa RoboCup Four Legged Team. This lecture describes both the development process and the technical details of its end result. The main contributions of this lecture are: i) a roadmap for new classes and research groups interested in intelligent autonomous robotics who are starting from scratch with a new robot, and ii) documentation of the algorithms behind our own approach on the AIBOs with the goal of making them accessible for use on other vision-based and/or legged robot platforms.
