King,1988-06-18 This exploration of the economic underworld and its treatment by orthodox economists has at its core a set of intellectual biographies of nine economic heretics ranging from Sir James Steuart in the 18th century to E F Schumacher in the 20th and covering a wide political spectrum *Controversy Catastrophism and Evolution* Trevor Palmer,2012-12-06 In Controversy Trevor Palmer fully documents how traditional gradualistic views of biological and geographic evolution are giving way to a catastrophism that credits cataclysmic events such as meteorite impacts for the rapid bursts and abrupt transitions observed in the fossil record According to the catastrophists new species do not evolve gradually they proliferate following sudden mass extinctions Placing this major change of perspective within the context of a range of ancient debates Palmer discusses such topics as the history of the solar system present day extraterrestrial threats to earth hominid evolution and the fossil record **Bulletin of the Atomic Scientists** ,1972-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world Outsider Theory Jonathan Eburne,2018-09-18 A vital and timely reminder that modern life owes as much to outlandish thinking as to dominant ideologies What do the Nag Hammadi library Dan Brown s The Da Vinci Code speculative feminist historiography Marcus Garvey s finances and maps drawn by asylum patients have in common Jonathan P Eburne explores this question as never before in Outsider Theory a timely book about outlandish ideas Eburne brings readers on an adventure in intellectual history that stresses the urgency of taking seriously especially in an era of fake news ideas that might otherwise be discarded or regarded as errant unfashionable or even unreasonable Examining the role of such thinking in contemporary intellectual history Eburne challenges the categorical demarcation of good ideas from flawed wild or bad ones addressing the surprising extent to which speculative inquiry extends beyond the work of professional intellectuals to include that of nonprofessionals as well whether amateurs unfashionable observers or the clinically insane Considering the work of a variety of such figures from popular occult writers and gnostics to so called outsider artists and pseudoscientists Eburne argues that an understanding of its circulation and recirculation is indispensable to the history of ideas He devotes close attention to ideas and texts usually omitted from or marginalized within orthodox histories of literary modernism critical theory and continental philosophy yet which have long garnered the critical attention of specialists in religion science studies critical race theory and the history of the occult In doing so he not only sheds new light on a fascinating body of creative thought but also

proposes new approaches for situating contemporary humanities scholarship within the history of ideas However important it might be to protect ourselves from bad ideas Outsider Theory shows how crucial it is for us to know how and why such ideas have left their impression on modern day thinking and continue to shape its evolution **The Metaphysics of Modern Existence** Vine Deloria, Jr., Daniel Wildcat, David Wilkins, 2012-09-01 Vine Deloria Jr named one of the most influential religious thinkers in the world by Time shares a framework for a new vision of reality Bridging science and religion to form an integrated idea of the world while recognizing the importance of tribal wisdom The Metaphysics of Modern Existence delivers a revolutionary view of our future and our world *Immanuel Velikovsky Reconsidered*, 1979 *Groovy Science* David Kaiser, W. Patrick McCray, 2016-05-31 Groovy Science paints a decidedly different picture of the sixties counterculture by uncovering an unabashed embrace of certain kinds of science and technology While many rejected science and technology that struck them as hulking depersonalized or militarized theirs was a rejection of Cold War era missiles and mainframes not science and technology per se We see in these pages the long running annual workshops on quantum physics at the Esalen Institute in Big Sur California aerospace engineers turning their knowledge of high tech materials to the short board revolution in surfing Timothy Leary's championing of space colonization as the ultimate high and midwives redirecting their medical knowledge to launch a home birth movement Groovy Science gathers intriguing examples like these from across the physical biological and social sciences and charts commonalities across these many domains highlighting shared trends and themes during one of the most colorful periods of recent American history The result reveals a much more diverse picture of how Americans sought and found alternative forms of science that resonated with their social and political goals
