**Mathematics in Models, Artificial Neural Networks and Arts** Vittorio Capecchi, Massimo Buscema, Pierluigi  
 Contucci, Bruno D'Amore, 2010-08-03 The book shows a very original organization addressing in a non traditional way but  
 with a systematic approach to who has an interest in using mathematics in the social sciences The book is divided in four  
 parts a a historical part written by Vittorio Capecchi which helps us understand the changes in the relationship between  
 mathematics and sociology by analyzing the mathematical models of Paul F Lazarsfeld the model of simulation and artificial  
 societies models of artificial neural network and considering all the changes in scientific paradigms considered b a part  
 coordinated by Pier Luigi Contucci on mathematical models that consider the relationship between the mathematical models  
 that come from physics and linguistics to arrive at the study of society and those which are born within sociology and  
 economics c a part coordinated by Massimo Buscema analyzing models of artificial neural networks d a part coordinated by  
 Bruno D Amore which considers the relationship between mathematics and art The title of the book *Mathematics and Society*  
 was chosen because the mathematical applications exposed in the book allow you to address two major issues a the general  
 theme of technological innovation and quality of life among the essays are on display mathematical applications to the  
 problems of combating pollution and crime applications to mathematical problems of immigration mathematical applications  
 to the problems of medical diagnosis etc b the general theme of technical innovation and creativity for example the art and  
 mathematics section which connects to the theme of creative cities The book is very original because it is not addressed only  
 to those who are passionate about mathematical applications in social science but also to those who in different societies are  
 a involved in technological innovation to improve the quality of life b involved in the wider distribution of  
 technological innovation in different areas of creativity as in the project Creative Cities Network of UNESCO **El-Hi**
