## **Social Amnesia:**

Social Amnesia Russell Jacoby, 2018-04-27 Russell Jacoby defines social amnesia as society's repression of remembrance society's own past In this book Jacoby excavates the critical and historical concepts that have fallen prey to the dynamic of a society that strips them both of their historical and critical content Social Amnesia is an effort to remember what is perpetually lost under the pressure of society It is simultaneously a critique of present practices and theories in psychology Jacoby's new self evaluation has the same sharp edge as the book itself offering special insights into the evolution of psychological theory during the past two decades In his probing self critical new introduction Jacoby maintains that any serious appraisal of psychology or sociology or any discipline must seek to separate the political from the theoretical He discusses how in the years since Social Amnesia was first published society has oscillated from extreme subjectivism to extreme objectivism which feed off each other and constitute two forms of social amnesia a forgetting of the past and a pseudo historical consciousness Social Amnesia contains a forceful argument for thinking against the grain an endeavor that remains as urgent as ever It is an important work for sociologists psychologists and psychoanalysts *Social Amnesia* Russell Jacoby, 1975 Rhyming text and illustrations follow a mischievous old black fly through the alphabet as he has a very busy bad day landing where he should not be As Leaven in the World Thomas M. **An Informed Faith** R. J. Rushdoony, 2017-07-11 Our faith should be an informed one because the God who created all things speaks to every sphere of life and all facts should be studied in light of the revelation of God in Scripture This is the

foundation of Christian dominion For R J Rushdoony true government was the self government of the Christian life in terms of God s law so he wrote his position papers to better equip Christians to apply their faith to all of life His objective was not to empower the state or the organized church but rather to call every person and institution to God s Word which often put him at odds with both church and state This three volume collection of his position papers 1979 2000 are organized topically and are featured for the first time with an extensive index which will make this material far more accessible to the studious reader This beautiful three volume collection of hardback books topically organizes ALL of Rushdoony s position papers not only the 115 originally published in *Roots of Reconstruction* but also 118 later essays including six recently discovered unpublished papers [Opposing Colonialism, Antisemitism, and Turbo-Nationalism](#) Marina Gržinić, Jovita Pristovšek, 2019-11-25 This volume gathers together reflections on racism and nationalism empowerment and futurity It focuses on collective amnesia in regards to traumatic events of the European past and the ways in which memory and history are presented for the future The essays cover and oppose the seemingly disparate genocides committed during Belgian colonialism Austrian antisemitism and turbo nationalism in Republika Srpska Bosnia and Herzegovina implying by no means a homogenization of the experiences What connects these historical situations is the fact that despite available documents to this very day nation states are built on practices of oblivion regarding their past This volume is indispensable for theoreticians philosophers and historians as well as the general public It expresses the demand to critically question our inherited knowledge and to rethink the past for a new future of conviviality **Processing the Past** Francis X. Blouin Jr., William G. Rosenberg, 2011-01-21 *Processing the Past* explores the dramatic changes taking place in historical understanding and archival management and hence the relations between historians and archivists Written by an archivist and a historian it shows how these changes have been brought on by new historical thinking new conceptions of archives changing notions of historical authority modifications in archival practices and new information technologies The book takes an archival turn by situating archives as subjects rather than places of study and examining the increasingly problematic relationships between historical and archival work By showing how nineteenth and early twentieth century historians and archivists in Europe and North America came to occupy the same conceptual and methodological space the book sets the background to these changes In the past authoritative history was based on authoritative archives and mutual understandings of scientific research These connections changed as historians began to ask questions not easily answered by traditional documentation and archivists began to confront an unmanageable increase in the amount of material they processed and the challenges of new electronic technologies The authors contend that historians and archivists have divided into two entirely separate professions with distinct conceptual frameworks training and purposes as well as different understandings of the authorities that govern their work *Processing the Past* moves toward bridging this divide by speaking in one voice to these very different audiences Blouin and Rosenberg conclude by raising the worrisome question of what

future historical archives might be like if historical scholars and archivists no longer understand each other and indeed whether their now different notions of what is archival and historical will ever again be joined Frankfurt School J.
