**East Asia's Reemergence** Philip S. Golub, 2016-05-27 East Asia has re emerged after a long eclipse as a centre of world wealth creation and growth Over the past four decades the region s share of world GDP has risen from less than 10 to 30 percent a ratio that is set to rise to 40 percent by 2030 What has made East Asia s remarkable ascent possible and what does this economic rebalancing between East and West mean for world politics In this insightful and provocative book Philip Golub addresses these questions tracing the region s rise from the early modern European Asian encounter to the imperial confrontations of the nineteenth century and China s state capitalist turn in the latter half of the twentieth century Together he argues the dynamics of imperialism war and revolution led to the constitution of developmental states that made possible East Asia s return to a central position in the global economy Combining rich historical narrative and social theory this book is an invaluable guide to one of the core issues in world politics today

**National perspectives on a multipolar order** Benjamin Zala, 2021-10-26 The global distribution of power is changing But how should we make sense of this moment of transition With the rise of new powers and the decline of seemingly unchallenged US dominance in world politics a conventional wisdom is gaining ground that a new multipolar order is taking shape Yet multipolarity an order with multiple centres of power is variously used as a description of the current distribution of power of the likely shape of a future global order or even as a prescription for how power should be distributed in the international system To understand the power of the different and sometimes competing narratives on offer today about the changing global order a global perspective is necessary This book explores how the concept of a multipolar order is being used for different purposes in different national contexts From rising powers to established powers contemporary debates are analysed by a set of leading scholars to provide in depth insight into the use and abuse of a widely employed but rarely explored concept

academics **America's Half-Century** Thomas J. McCormick, 1995-02 Revised and updated through 1993 it describes how the end of the Cold War affected the United States's global role as well as suggesting what possibilities lie ahead for a restructured world system

**Russia** Great Britain: Parliament: House of Commons: Defence Committee, 2009-07-10 With Russia's increasingly assertive foreign policy the Committee decided on an inquiry encapsulating the uncertain relations between the West and Russia The Russian State is a major player on the world stage It exerts significant influence over international and European affairs that affect UK security and interests Russia does this not only through its still significant military capability but also through a range of other levers such as the use of energy as a foreign policy tool Russia does not currently pose a direct threat to UK homeland security nor is likely to do so in the near future But it is understandable that some of Russia's neighbouring states should feel concerned about the possibility of Russian military action against them given Russia's actions in Georgia Consequentially NATO has an important role in reassuring its Eastern European members about their security The military actions by Russia and Georgia were unacceptable The Government should send a strong message to Russia that it needs to withdraw its military forces from Georgian territory to its pre conflict positions NATO's relations with Russia are critical as there are many shared global challenges that are best addressed jointly such as tackling terrorism nuclear non proliferation and climate change The Committee welcomes the resumption of formal engagement between NATO and Russia on the NATO Russia Council but there needs to be honest dialogue on areas of disagreement as well as agreement The Government should encourage the Council to be used as a forum to discuss difficult strategic issues as well as areas where cooperation is easier Relations between Russia and the West are complex and characterised by mutual dependency Russia needs the goodwill of the international community to maintain its strong international trading links The West needs Russia's cooperation to tackle many shared global challenges However cooperation should not come at the price of accepting the legitimacy of a Russian sphere of influence though it has valid interests in the countries that surround it undue influence would risk compromising the sovereignty of these states This would be against the UK's national interests as European security is enhanced by having stable democratic and independent states across Europe The Government should adopt a hardheaded approach to engagement with Russia based on the reality of Russia's foreign policy rather than abstract and misleading notions of shared values
