A Stereo-atlas of Ostracod Shells Peter Colley Sylvester-Bradley,David J. Siveter,1988 **Hybrid Photography** Sara Hillnhuetter,Stefanie Klamm,Friedrich Tietjen,2021-04-07 This book explores the territories where manual graphic photographic and digital techniques interfere and interlace in sciences and humanities It operates on the assumption that when photography was introduced it did not oust other methods of image production but rather became part of ever more specialized and sophisticated technologies of representation The epistemological break commonly set with the advent of photography since the nineteenth century has probably been triggered by photographic techniques but certainly owes much to the availability of a plethora of hybrid media media that influence the relation of sciences humanities and their methods

and subjects This book will be of interest to scholars in art and visual culture photography and history of photography
