Studies In Contemporary Metaphysics:

Studies in Contemporary Metaphysics Reinhold Friedrich Alfred Hoernlé,1920 *Studies in Contemporary Metaphysics* R. F. Alfred Hoernle,2020-10-14 Originally published in 1920 this title wrestles with the critical conflict in modern philosophy of whether philosophers should employ pure reason in a world of abstracts or rather should rely upon experience and rationality to examine the actual world Hoernl argues for the latter and emphasises the importance of metaphysics in the intellectual quest for knowing reality This title is ideal for students of philosophy and provides insightful background into the diverging philosophical views of the early 20th century **Studies in Contemporary Metaphysics** R. Studies in Contemporary Metaphysics R. F. Hoernlé, 2016-04-22 From the PREFACE The Studies contained in this volume may be described as chips from a metaphysician's workshop or perhaps I should rather say blocks hewn out experimentally in the effort after a systematic synthesis not unlike the painter's sketches or the sculptor's rough modellings in clay which precede the finished work The day for systems we are constantly told is passed but not let us hope the day for philosophers to continue the effort to think systematically Much scorn has been poured on the philosophical systems which sprang into being so abundantly a hundred years ago fit heralds of a century which has been well called in retrospect the Century of Hope We children of an age of disillusionment need to recapture something of the confidence the speculative daring of the great thinkers of the past On the printed page their systems are apt to appear as vain attempts to imprison the rich and varied life of the world in a rigid pattern of conceptual pigeon holes But of their spirit their endeavor after wholeness their effort to think systematically we cannot have enough We certainly need more than we have At any rate the following Studies are inspired by the conviction itself not an a priori assumption but a conclusion slowly gathered from the business of philosophizing that experience taken as a whole gives us clues which rightly interpreted lead to the perception of order in the universe a graded order of varied appearances The concepts of the order of the universe and in the Platonic phrase of the saving of the appearances define between them the ideal which I have had before me The saving of appearances calls for a theory which enables us to appreciate each appearance for what it really is and which exhibits each in its place among other appearances in the universe I should be false to this conviction if I did not add that it does not seem to me alien to the practical task of meeting the varied incidents of human life with steadfast wisdom The student surveying the multifarious tendencies and movements of contemporary thought may well feel as if he stood at the parting of many ways presented as alternatives for his choice On the one side he will find himself told that the philosophic spirit is in essence subjective and sentimental that it allows moods and desires to color its view of the world that it rebels against the inevitable limits of human knowledge He will be advised to turn his back on the chaos of the actual world and seek comfort amidst the eternal verities of pure reason He will hear it said that only those subjects are fit for the philosopher's attention in the study of which he can be ethically neutral He may meet with the view that it has never yet been proved that the universe is not a grand and in parts rather cruel joke and that he who enters into the joke and plays with it is more likely to get real insight

than he who takes the universe seriously and stakes reason and happiness on its orderliness and goodness On the other hand he will meet with a continuous tradition in philosophy supported by the greatest thinkers of the past and vigorous at the present day not from mere subservience to their authority but because fresh generations of philosophers find the insight of their predecessors verified by their own thinking This tradition stands for the rationality of the universe not merely in the formal sense of every detail in it being subject to the law of sufficient reason but even more in the profounder sense of its being the home of the values which we commonly call spiritual Such briefly are the alternatives before the student His choice cannot be settled by tossing It cannot like the choice of Buridan's ass be unmotivated And though it be temperamental it will not therefore be irrational or arbitrary

Studies on Early Modern Aristotelianism Paul Richard Blum, 2012-06-22 In *Studies on Early Modern Aristotelianism* Paul Richard Blum shows that Aristotle's thought remained the touchstone of modern philosophy for it was the philosophy taught at universities The concept of philosophy at Jesuit schools forms the first part of this book Their impact on the sciences and mathematics in combination with Renaissance ideas of nature is the topic of the second part The transformation of

Aristotelian metaphysics and theology under the influence of the Renaissance is the third area of this book Surprising continuity from the late Middle Ages into modernity and the radical difference of subject centered modern philosophy from teachable school philosophy are innovative in these studies *Journal of the American Society for Psychical Research* American Society for Psychical Research,1922 List of members in v 1 6 12 *University of California Publications in Philosophy* University of California (1868-1952),1924 **Booklist** ,1920 **International Journal of Ethics** ,1921 Includes section Book reviews The Booklist ,1920 **Proceedings of the Aristotelian Society** ,1921 **The Publishers Weekly** ,1920 *The United States Catalog* Mary Burnham,Carol Hurd,1928 Religion in the Thought of Today Carl Safford Patton,1924 **Symbolism and Truth** Ralph Monroe Eaton,1925 This is a new release of the original 1925 edition
