Semiotics in Poland 1894-1969 J. Pelc, 2012-12-06 In the Introduction to the Polish language version of the present book I expressed the hope that Polish studies in semiotics would before long be numerous enough to make possible another anthology on semiotics in Poland containing material published since 1970 That hope has in fact come true The fact that semiotic research has been gaining momentum in this country is reflected in the growing interest in the discipline in expanding international contacts and in the steady increase in the number of publications Thus 1972 saw the setting up of the Department of Logical Semiotics headed by the present writer at Warsaw University Institute of Philosophy The seminar on semiotics which I started in 1961 had met more than two hundred times by the end of 1976 since 1968 meetings have been held jointly with the Polish Semiotic Society Another seminar confined to university staff and concerned with logical semiotics which was initiated in 1970 had met more than fifty times by the end of 1976 The former seminar often plays host to foreign visiting professors so far scholars from Australia Belgium Britain Canada Czechoslovakia France the German Democratic Republic Italy the Netherlands the Soviet Union and the United States have attended *Semiotic Theory and Practice* Michael Herzfeld, Lucio Melazzo, 1988 [Sign, System and Function](#) Jerzy Pelc, Thomas A. Logic - Language - Ontology Urszula B. Wybraniec-Skardowska, 2022-12-01 How should we think about the meaning of the words that make up our language How does reference of these terms work and what is their referent when these are connected to abstract objects rather than to concrete ones Can logic help to address these questions This collection of papers aims to unify the questions of syntax and semantics of language which span across the fields of logic philosophy and ontology of language The leading motif of the presented selection is the differentiation between linguistic tokens material concrete objects on the one hand and linguistic types ideal abstract objects on the other Through a promenade among articles that span over all of the Author's career this book addresses the complex philosophical question of the ontology of language by following the crystalline conceptual tools offered by logic At the core of Wybraniec Skardowska's scholarship is the idea that language is an ontological being characterized in compliance with the logical conception of language proposed by Ajdukiewicz The application throughout the book of tools of classical logic and set theory results fosters the emergence of a general formal logical theory of syntax semantics and of the pragmatics of language which takes into account the duality token type in the understanding of linguistic expressions Via a functional approach to language itself logic appears as ontologically neutral with respect to existential assumptions relating to the nature of linguistic expressions and their extra linguistic counterparts

The book is addressed to readers both at the graduate and undergraduate level but also to a more general audience interested in getting a firmer grip on the interplay between reality and the language we use to describe and understand it
