**Corporate Governance and Firm Value in Italy** Bruno Buchetti, 2021-01-04 This book expands on the literature on the characteristics of management boards by especially focusing on family listed and family controlled

companies as they are ideal for studying board heterogeneity. It uses specific multidimensional indices and in depth econometric analysis to introduce new variables such as international experience that represent a source of competitive advantage for firms in today's globalized world. In addition, by examining the heterogeneity ratio and the representation of independent and family directors, the book demonstrates how family controlled firms use independent directors to import their heterogeneous expertise. The book makes a threefold contribution for regulators: it offers suggestions on improving the quality of reporting in family controlled firms; for researchers, it demonstrates the importance of including directors' characteristics apart from the firm specific factors in their analyses; and for practitioners, it shows that selecting directors with specific characteristics can have a substantial impact on firms' performance.

**Traces of the Infantile in Psychoanalytic Therapy with Adults** Björn Salomonsson, 2025-11-05. This book applies parent-infant therapy techniques to allow therapists to work effectively with adult patients on their earliest traumas. There is an increased awareness among therapists, parents and stakeholders that attempts to address psychological challenges in the first year of life could diminish the risk of later non-optimal development.

Furthermore a deeper understanding of such challenges and distress in parent infant dyads can influence therapeutic work with adult patients by helping them discern the traces of the Infantile within Drawing on his extensive clinical experience and application of the parent infant psychotherapy PIP technique Salomonsson offers a clear guide to how therapists can tie together experiences from adulthood and childhood memory and family myth and verbal and non verbal communication from the patient to tease out the origin of the adult patient s trauma and to allow for more informed and targeted treatment The author argues that moving between PIP and adult therapeutic work is compatible with psychoanalytic theory and emphasises the importance of its inclusion in therapy training Enriched with clinical vignettes and a focus on practical work this is an essential read for all psychoanalysts and psychotherapists
