Study of Agricultural Systems Graham Eyre Dalton, 1975 The study of agricultural systems Systems methodology Application of a systems approach in practice Applications of a systems approach to research *Study of Agricultural Systems* International Symposium on Study of Agricultural Systems (1974 ; Reading), 1975 *Research on Agricultural Systems* Jean Philippe Colin, 2000 The purpose of this book is to provide an overview of research on agricultural systems that is both broad and selective The focus is broad by covering approaches used in a number of disciplines as well as in multidisciplinary studies and by defining agricultural systems to include cropping systems fanning systems agricultural household systems and agricultural systems at higher levels such as the agrarian system The focus is selective by emphasizing key methods and ongoing debates rather than attempting a comprehensive review of literature Most previous reviews of research on agricultural systems have concentrated on a particular approach eg farming systems research FSR including comparisons of anglophone and francophone variants of FSR or on research conducted in specific geographical settings A History of Farming Systems Research Michael P. Collinson, 2000 This book provides a detailed history of farming systems research FSR While it includes the application of FSR to developed country agriculture its main focus is on FSR in its original role with small scale resource poor farmers in less developed countries There are some 40 contributions from nearly 50 contributors from 20 countries illustrating both the diversity and yet the coherence of FSR The five parts of the book cover 1 FSR understanding farmers and their farming FSR origins and perspectives understanding farming systems 2 the applications of farming systems research FSR in technology choice and development FSR in extension and policy formulation 3 institutional commitment to FSR FSR some institutional experiences in national agricultural research dimensions of the organization of FSR training for FSR 4 FSR the professional dimension regional and international associations FSR and the professional disciplines and 5 cutting edge methods abiding issues and the future for FSR

book Some new material has been added particularly where it has been possible to update data and there has been some change of emphasis in places in order to reflect changing world conditions The book retains its original purpose however of introducing systems thinking as applied to agriculture I am grateful to Angela Hoxey for help in preparing this edition especially in relation to the preparation of tables and figures C R W SPEDDING v Preface to the First Edition The agricultural systems of the world represent a very large subject Their study involves a great deal of fairly detailed knowledge as well as a grasp of the structures and functions of the systems themselves This book has been written as an introduction to such a study and it concentrates on an overall view rather than on the detail partly because of the need to relate the latter to some larger picture in order to appreciate the relevance and significance of the detail This problem of seeing the relevance of component studies and the significance of physical biological and economic detail and indeed principles is encountered by many agricultural students right at the beginning of their university careers Farming Systems Research Jayne T. MacLean, National Agricultural Library (U.S.), 1988 Research Brief University of Wisconsin--Madison.
