Abstract

In a recent interdisciplinary study, Das et al. have attempted to trace the homeland of Ashkenazi Jews and of their historical language, Yiddish (Das et al. 2016). Localizing Ashkenazic Jews to Primeval Villages in the Ancient Iranian Lands of Ashkenaz, *Genome Biol. Evol.* 8:1132–1149. Das et al. applied the geographic population structure (GPS) method to autosomal genotyping data and inferred geographic coordinates of populations supposedly ancestral to Ashkenazi Jews, placing them in Eastern Turkey. They argued that this unexpected genetic result goes against the widely accepted notion of Ashkenazi origin in the Levant, and speculated that Yiddish was originally a Slavic language strongly influenced by Iranian and Turkic languages, and later remodeled completely under Germanic influence. In our view, there are major conceptual problems with both the genetic and linguistic parts of the work. We argue that GPS is a provenancing tool suited to inferring the geographic region where a modern and recently unadmixed genome is most likely to arise, but is hardly suitable for admixed populations and for tracing ancestry up to 1,000 years before present, as its authors have previously claimed. Moreover, all methods of historical linguistics concur that Yiddish is a Germanic language, with no reliable evidence for Slavic, Iranian, or Turkic substrata.

Key words: population genetics, Ashkenazi Jews, Yiddish, geographic population structure, relexification.

Das et al. (2016) have recently presented an unorthodox interpretation of the history of Ashkenazi Jews, suggesting that they originated from a “Slavo-Iranian confederation”. This claim is essentially based on application of the geographic population structure (GPS) approach (Elhaik et al. 2014) to high-density autosomal single nucleotide polymorphism (SNP) data. GPS was used to infer geographic coordinates of populations supposedly ancestral to Ashkenazi Jews—

“primeval villages” (Das et al. 2016)—which were then interpreted at great length to support the Yiddish relexification hypothesis advanced earlier by one of the coauthors (Nieder 1991, 2002, 2010); an hypothesis that Yiddish was originally a Slavic language later remodeled completely under Germanic influence. In our view, there are major conceptual problems with both the genetic and linguistic components of the work. Below we argue that GPS is a provenancing tool, at best suited

Study Of Population A Geographic Approach:

Making Population Geography Adrian Bailey, 2014-05-01 Making Population Geography is a lively account of the intellectual history of population geography arguing that while population geography may drift in and out of fashion it must continue to supplement its demographic approach with a renewed emphasis on cultural and political accounts of compelling population topics such as HIV AIDS sex trafficking teen pregnancy citizenship and global ageing in order for it to shed light on contemporary society Making Population Geography draws both on the writings of those like Wilbur Zelinsky and Pat Gober who were at the very epicentre of spatial science in the 1960s and those like Michael Brown and Yvonne Underhill Sem whose post punk introspections of method content and purpose now push the field in new directions Using a wide range of case studies contemporary examples and current research the book links the rise and fall of the key concepts in population geography to the changing social and economic context and to geographys turn towards social theory Referencing the authors classroom experiences both in the US and the UK Making Population Geography will appeal to students studying geography population issues and the development of critical scholarship
