**Entropy and the Magic Flute** Harold J. Morowitz, 1993-06-10 Harold Morowitz has long been regarded highly both as an eminent scientist and as an accomplished science writer The essays in *The Wine of Life* his first collection were hailed by C P Snow as some of the wisest wittiest and best informed that I have read and Carl Sagan called them a delight to read In later volumes such as *Mayonnaise and the Origin of Life* and *The Thermodynamics of Pizza* he has established a reputation for a wide ranging intellect an ability to see unexpected connections and draw striking parallels and a talent for communicating scientific ideas with optimism and wit Kirkus Reviews praised *Mayonnaise* as wonderfully diverting and very wise Nature wrote of *Thermodynamics* his chocolate coated nuggets of science will continue to entertain and do surreptitious good With *Entropy and the Magic Flute* Morowitz once again offers an appealing mix of brief reflections on everything from litmus paper to the hippopotamus to the sociology of Palo Alto coffee shops Many of these pieces are appreciations of scientists that Morowitz holds in high regard In the title piece for instance Morowitz tells of his pilgrimage to the grave of Ludwig Boltzmann buried in the same cemetery Vienna s Central Cemetery as Beethoven Schubert and Brahms He also writes of J Willard Gibbs thought by many to be the greatest scientist yet produced by the United States Jean Perrin author of *Les Atomes* a now forgotten classic that convinced virtually everyone in science of the validity of the atomic hypothesis Einstein Newton on the occasion of the 300th anniversary of his *Principia* a date that passed virtually unnoticed except by Morowitz Murray Gell Mann and Aristotle Of Aristotle Morowitz observes that most people whose information comes from academic philosophy fail to appreciate that among his many fields of expertise first and foremost Aristotle was a biologist Indeed fully a third of Aristotle s writings are on the life sciences almost all of which has been left out of standard editions of his work Many other pieces focus on health issues such as America s obsession with cheese toppings the addiction to smoking of otherwise intelligent people questionable obstetric practices and several touch upon ethics whistle blowing and scientific research There is also a fascinating piece on the American Type Culture Collection a zoo or warehouse for microbes that houses some 11 800 strains of bacteria and over 3 000 specimens of protozoa algae plasmids and oncogenes Here then are over forty light graceful essays in which one of our wisest experimental biologists comments on issues of science technology society philosophy and the arts

**The Price of Magic** Shannon McRoberts, 2020-11-25 Nothing is ever free Serein was born into a world where you either had the ability to use magic or you did not For the longest time Serein believed she was like any other Mirthless and unable to use magic Serein was fine with her non magic lot in life until it caused her to have a target on her back Dahlia was an opportunistic businesswoman always looking for a way to make money When she found one of her mother's spells that could give Mirthless the ability to use magic she knew she could find a way to turn a profit with her new service if she could find a test subject The day Dahlia chose Serein to be her test subject was supposed to be the start of a new beginning for the both of them Dahlia thought Serein would be happy to finally have magic but she was not Now Serein must live with the price of her magic which may just cost her everything

**The Psychology of Magic and the Magic of Psychology** Amir Raz, Jay A. Olson, Gustav Kuhn, 2016-11-18 Magicians have dazzled audiences for many centuries however few researchers have studied how let alone why most tricks work The psychology of magic is a nascent field of research that examines the underlying mechanisms that conjurers use to achieve enchanting phenomena including sensory illusions misdirection of attention and the appearance of mind control and nuanced persuasion Most studies to date have focused on either the psychological principles involved in watching and performing magic or neuromagic the neural correlates of such phenomena Whereas performers sometimes question the contributions that modern science may offer to the advancement of the magical arts the history of magic reveals that scientific discovery often charts new territories for magicians In this research topic we sketch out the symbiotic relationship between psychological science and the art of magic On the one hand magic can inform

psychology with particular benefits for the cognitive social developmental and transcultural components of behavioural science. Magicians have a large and robust set of effects that most researchers rarely exploit. Incorporating these effects into existing experimental even clinical paradigms paves the road to innovative trajectories in the study of human behaviour. For example, magic provides an elegant way to study the behaviour of participants who may believe they had made choices that they actually did not make. Moreover, magic fosters a more ecological approach to experimentation whereby scientists can probe participants in more natural environments compared to the traditional lab based settings. Examining how magicians consistently influence spectators for example can elucidate important aspects in the study of persuasion, trust, decision making and even processes spanning authorship and agency. Magic thus offers a largely underused armamentarium for the behavioural scientist and clinician. On the other hand, psychological science can advance the art of magic. The psychology of deception, a relatively understudied field, explores the intentional creation of false beliefs and how people often go wrong. Understanding how to methodically exploit the tenuous twilight zone of human vulnerabilities, perceptual, logical, emotional and temporal, becomes all the more revealing when top down influences including expectation, symbolic thinking and framing join the fray. Over the years, science has permitted magicians to concoct increasingly effective routines and to elicit heightened feelings of wonder from audiences. Furthermore, on occasion, science leads to the creation of novel effects or the refinement of existing ones based on systematic methods. For example, by simulating a specific card routine using a series of computer stimuli, researchers have decomposed the effect and reconstructed it into a more effective routine. Other magic effects depend on meaningful psychological knowledge such as which type of information is difficult to retain or what changes capture attention. Behavioural scientists measure and study these factors. By combining analytical findings with performer intuitions, psychological science begets effective magic. Whereas science strives on parsimony and independent replication of results, magic thrives on reproducing the same effect with multiple methods to obscure parsimony and minimise detection. This Research Topic explores the seemingly orthogonal approaches of scientists and magicians by highlighting the crosstalk as well as rapprochement between psychological science and the art of deception.

*Thomas Mann's The Magic Mountain*

Rodney Symington, 2011-09-22

Thomas Mann's novel *The Magic Mountain* presents a panorama of European society in the first two decades of the 20th century and depicts the philosophical and metaphysical dilemmas facing people in the modern age. In the years leading up to the First World War, the fundamental elements of human nature were thrown into sharp relief by the political tensions that resulted in the ultimate metaphor for the innate destructiveness of humankind: the War itself. If such a war is the true expression of human tendencies, what hope is there for the future? Through the figure of the main character of the novel, Thomas Mann explores the alternative philosophies of life available to human beings in the modern age and invites the reader to undertake a personal odyssey of discovery with a view to adopting a positive approach in an era that seems to offer no clear cut answers. This book is a comprehensive commentary on Thomas Mann's seminal

novel one of the key literary artefacts of the 20th century The author has taken upon himself the task of explaining all the references and allusions contained in the novel and of providing readers who know little or no German with enough explanatory comment to enable them to understand the novel and extract the maximum reading pleasure from it The Magic Mountain Thomas Mann,1927 *The Magic Skin* Honoré de Balzac,1911 **The magic skin, The quest of the absolute, and others stories** Honoré de Balzac,1901 *The magic skin, The quest of the absolute, and other stories* Honoré de Balzac,1901 *Magic* ,1901 The Magic of Jewels and Charms George Frederick Kunz,1915 *The magic skin.
