The Promethean Bridge:

The Promethean Bridge S. Giora Shoham, 2004 This is not a work on physics nor is it a tract on personality but rather an effort to link them together in order to examine the cognitive relationship of humans with their surroundings We explore the interaction between the human mind and energy matter the adoption of quantum mechanics allows us to bridge the distinction between physics and psychology We invoke here the principles of quantum mechanics symbols and great myths from Tantalus Sisyphus and Prometheus through the Kabbalah and the Gnostic religions to great historical figures in art and literature Our personality theory first expounded in *The Myth of Tantalus* 1979 is expanded here into truly interdisciplinary research examining the relationship of humans with God and the universe We claim that myths reflect the human mind more profoundly than any other means available they serve as a bridge to unknown parts of the human psyche and history and form the basis for human behavior for centuries We therefore use a method we call myth empiricism It is indeed amazing to see the connection between the structure of the human mind and that of energy matter as it is reflected in the mytho empirical context *Émigré, Exile, Diaspora, and Transnational Movements of the Crimean Tatars* Filiz Tutku Aydın, 2021-06-18 This book explains the unexpected mobilization of the Crimean Tatar diaspora in recent decades through an exploration of the exile experiences of the Crimean Tatars in Central Asia Middle East Eastern Europe and North America This book adds to the growing literature on diaspora case studies and is essential reading for researchers and students of diasporas migration ethnicity nationalism transnationalism identity formation and social movements Moreover this book is relevant both for specialists in Crimean Tatar Studies and for the larger fields of Communist Post Communist Middle Eastern European and American studies **The Prometheus vincetus of Aeschylus** Aeschylus, 1902 Sophocles and the Politics of Tragedy Jonathan N. Badger, 2013-03-05 Sophocles and the Politics of Tragedy is an inquiry into a fundamental political problem made visible through the tragic poetry of Sophocles In part I Badger offers a detailed exegesis of three plays Ajax Antigone and Philoctetes These plays share a common theme illuminating a persistent feature of political life namely the antagonism between the heroic commitment to the beautiful and the transcendent on the one hand and the community's need for bodily safety and material security on the other This conceptual structure not only helps us understand these plays but also establishes a distinctive vision of the tragic dimension of political life a vision that can be applied fruitfully to examinations of political projects quite distant from the world of fifth century Athens Such an application is the aim of part II in which Badger coordinates the results of the inquiries of part I and applies them to a consideration of the competing claims of three strands of medieval and early modern political philosophy ecclesiastical rule scientific domination and liberal government Badger identifies the last of these early modern liberalism as a tragic politics that seeks to sustain and contain the tension between transcendent longing and material need And Man Created God Shlomo Giora Shoham, 2011-08-08 *And Man Created God* presents a new theory of mytho empiricism based on the mythological concepts of Claude Lévi Strauss

and the structuralism of Jeanne Piaget The whole nature of mythogenes as the creative force linking history and transcendence is then elucidated The corpus of myths in the books of Genesis and Exodus are presented in a new light and then compared with the Egyptian Mesopotamian and Greek mythologies to highlight the Judaic myths with the pagan contrast "The" Athenaeum ,1885 *Bridges to Global Ethics* Giuseppe Di Capua,Luiz Oosterbeek,2023-02-20 This book contributes to the current discussion on geoethics and global ethics within the geoscience and humanities communities It provides new content and insights into developing convergent human actions in response to global anthropogenic changes based on perspectives that make it possible to combine geoscience knowledge with humanities and social sciences approaches Selected authors present their reflections findings and insights regarding the vision of geoethics ethics of responsibility towards the Earth as global ethics from philosophical humanities and social sciences perspectives In addition they discuss ethical frameworks from diverse cultural traditions searching for points of intersection with geoethics The goal for global environmental problems to be managed via multi perspective approaches that can more effectively accommodate complexity Combining the strengths of the geosciences humanities and social sciences can pave the way for a paradigm shift in how human societies develop adaptive sustainable responses to environmental changes and societal inequalities The Genesis of Genesis Shlomo Giora Shoham,2011-01-18 The Genesis of Genesis is about the mytho empiricism of creation cosmogony In its attempt to compare the mythologies of the ancient Eastern Mediterranean cultures Egyptian Greek Judaic and Mesopotamian the Judaic cosmogony of genesis which is unique in its reliance on the word as creative agent is contrasted with the Egyptian Greek and Mesopotamian mythologies which are more deterministic **Animals and Animality in Primo Levi's Work** Damiano Benvegnù,2018-06-21 Situated at the intersection of animal studies and literary theory this book explores the remarkable and subtly pervasive web of animal imagery metaphors and concepts in the work of the Jewish Italian writer chemist and Holocaust survivor Primo Levi 1919 1987 Relatively unexamined by scholars the complex and extensive animal imagery Levi employed in his literary works offers new insights into the aesthetical and ethical function of testimony as well as an original perspective on contemporary debates surrounding human animal relationships and posthumanism The three main sections that compose the book mirror Levi s approach to non human animals and animality from an unquestionable bio ethical origin Suffering through an investigation of the relationships between writing technology and animality Techne to a creative intellectual project in which literary animals both counterbalance the inevitable suffering of all creatures and suggest a transformative image of interspecific community **Classical Myths in the Plays of Swinburne, Bridges, Sturge Moore, and Eliot** Jotirmoy Guha Thakurtha,1973 Aeschylus.
