Murphy,2002 Character

Education in America's Blue Ribbon Schools is based upon descriptive documentary and qualitative research conducted on the award winning school applications in the United States Department of Education's Elementary School Recognition Program i.e. the Blue Ribbon Schools. The purpose of the program is to focus national attention on schools that are doing an exceptional job with all of their students. Areas studied are developing a solid foundation of basic skills and knowledge of subject matter and fostering the development of character values and ethical judgement. The first edition of this book reported on the first decade of this program from 1985 to 1994. The second edition adds the schools that have won the award from 1996-2001. Included are the Blue Ribbon schools that applied for Special Honors in Character Education and five that actually won that recognition in 1998-1999. This edition finds character education much stronger in American schools in recent years and is full of many promising practices. It is a practical book that will guide school administrators, teachers, parents, board members and concerned citizens interested in starting or strengthening the character education focus of their school.

Democracy, Bureaucracy, and Character William D. Richardson, 1997

Most American citizens are quick to criticize federal bureaucracy for its size and inefficiency. They assume it has exceeded the intent of our nation's founders yet men like James Madison and Alexander Hamilton knew that good public administrators were essential to good government. William Richardson here examines the origins, legitimacy and limitations of public administration from the perspective of the Founders' thought. He shows that these men, especially the authors of *The Federalist*, advocated an energetic public administration as an essential component of government and even considered the emergence of a natural aristocracy of virtuous civil servants. The Founders would see the fault of today's federal bureaucracy argues Richardson not as much in its size as in the character of its members. Richardson relates the Founders' belief that the nation should strive to produce public servants committed to developing character traits such as wisdom and moderation that would exemplify the highest ideals of the republic and thus ensure its survival. They anticipated some self-interest on the part of administrators but believed it would be held in check by public opinion and the political process. To test the success of the Founders' ideal, Richardson examines both the character of administrators and the role of ethics in forming that character. He explores the various plans for educating public leaders throughout American history and looks at how attitudes toward public administration have changed in this century from Woodrow Wilson's scientific ideal to recent proposals to downsize government. Among other suggestions, Richardson advocates reforming existing institutions by emphasizing character.

Democracy, Bureaucracy, and Character is an exercise in legitimizing public administration, offering important insights into the Founders' thoughts that can be applied to today's debate over government bureaucracy. Public administration may be problematic by nature, observes Richardson, but it is crucial to our form of government. Through his analysis, we can see that

while bureaucracy and democracy have long had an uneasy relationship neither can be effective unless we fully assess the place and purpose of character in the American regime *University of Iowa Studies in Character* University of Iowa. Institute of Character Research, 1928
