The Seven Portals:

Accelerating Human Evolution by Theosophical Initiation Yves Mühlematter, 2022-12-19 The main subjects of analysis in the present book are the stages of initiation in the grand scheme of Theosophical evolution. These initiatory steps are connected to an idea of evolutionary self-development by means of a set of virtues that are relative to the individual's position on the path of evolution. The central thesis is that these stages were translated from the Hindu tradition to the Theosophical tradition through multifaceted hybridization processes in which several Indian members of the Theosophical Society partook. Starting with Annie Besant's early Theosophy, the stages of initiation are traced through Blavatsky's work to Manilal Dvivedi and T. Subba Row, both Indian members of the Theosophical Society, and then on to the *San tana Dharma Text Books*. In 1898, the English Theosophist Annie Besant and the Indian Theosophist Bhagavan Das together founded the Central Hindu College, Benares, which became the nucleus around which the Benares Hindu University was instituted in 1915. In this context, the *San tana Dharma Text Books* were published. Mühlematter shows that the stages of initiation were the blueprint for Annie Besant's pedagogy, which she implemented in the Central Hindu College in Benares. In doing so, he succeeds in making intelligible how esoteric knowledge was transferred to public institutions and how a broader public could be reached as a result. The dissertation has been awarded the ESSWE PhD Thesis prize 2022 by the European Society for the Study of Western Esotericism.

Applications of Location Analysis H. A. Eiselt, Vladimir Marianov, 2015-09-22 This book, a companion to *Foundations of Location Analysis* (Springer, 2011), highlights some of the applications of location analysis within the spheres of businesses, those that deal with public services, and applications that deal with law enforcement and first responders. While the *Foundations* book reviewed the theory and first contributions, this book describes how different location techniques have been used to solve real problems. Since many real problems comprise multiple objectives, in this book there is more presence of tools from multicriteria decision making and multiple objective optimization. The section on business applications looks at such problems as locating bank branches, the potential location of a logistics park, sustainable forest management, and layout problems in a hospital, a much more difficult type of problem than mere location problems. The section on public services presents chapters on the design of habitats for wildlife control, forest fires, the location of intelligent sensors along highways for timely emergency response, locating breast cancer screening centers, an economic analysis for the locations of post offices, and school location. The final section of the book includes chapters on the well-known problem of locating fire stations, a model for the location of sensors for travel time information, the problem of police districting, locations of jails, location of Coast Guard vessels, and finally a survey of military applications of location analysis throughout different periods of recent history.
