Built from the debris of exploding stars that floated through space for billions of years, home to a zoo of tiny aliens and controlled by a brain with more possible connections than there are atoms in the universe, the human body is the most incredible thing in existence. In the sequel to his bestselling *Inflight Science*, Brian Clegg explores mitochondria in cell powerhouses which are thought to have once been separate creatures, how your eyes are quantum traps consuming photons of light from the night sky that have travelled for millions of years, your many senses which include the ability to detect warps in space and time, and why meeting an attractive person can turn you into a gibbering idiot. Read **THE UNIVERSE INSIDE YOU** and you'll never look at yourself the same way again. [The Unscripted Classroom](#) Susan Stacey, 2011-05-17

Your skeleton is the framework of your body. Bones provide protection but they do much more than that. They also produce blood cells and even act as storehouses for minerals the body may need in the future. This guidebook to the human skeletal system includes information about diseases, disorders, and injuries, and discusses how to keep your bones healthy. Numerous photographs and informative diagrams help readers understand the human body and provide a remarkable look at the skeletal system.
