## Thought And Reference:

*Colloquies of common people, reported by J. Anstie* James Anstie,1902      Pragmatism, Objectivity, and Experience  
Steven Levine,2019-01-24 Argues that satisfactory theories of objectivity must include the robust account of experience found in classical pragmatism      *Unreality* Charles Crittenden,2019-06-07 Charles Crittenden here offers an original solution to one of the traditional dilemmas of philosophy whether there can be any thing not existing since to say that some thing does not exist seems to presuppose its existence Drawing on the tools of Wittgensteinian philosophy and speech act theory Crittenden argues that we can and often do make reference to unreal objects such as fictional characters though they do not exist in any sense at all      God, Literature, and Process Thought Darren J. N. Middleton,2002 This book explores and evaluates evolutionary theism which asserts that God is subject to change as humanity is subject to change charting the way it surfaces as a theme in classic modern and post modern forms of creative writing philosophical theology and cultural theory Probing texts by process thinkers such as Whitehead Bergson Teilhard and Hartshorne as well as the literary art of figures such as Aeschylus Byron Goethe Greene Joyce Kazantzakis Levertov and Shakespeare the twelve scholars in this volume reflect on God and the world on reading and interpretation and on being and becoming The contributors emerge with fresh perspectives which promise to make a substantial contribution to the field of literature and religion today      **Music and Knowledge: A Performer's Perspective** Per Dahl,2019-02-18 FREELY AVAILABLE ONLINE AS OPEN ACCESS BOOK This book illustrates the acquisition of knowledge in a musician s performative practice and how this can contribute to the development of Artistic Research Using a broad understanding of knowledge the first part of the book presents aspects of the practitioner knowledge a musician develops through daily exercises and performances Technical and practical skills creativity and music reading are central topics Part II describes four different methodologies of knowledge accumulation First is the hypothetico deductive method music as object Then the author asks Where is the musical work After an introduction to semiotics the question that must follow is Is music a language Following up methodologies focusing on intersubjective and contextual topics the presentation of hermeneutics generates the question What happens to the music when you are listening Being the most subjective phenomenology is the last methodology to be presented The question it poses is Are analysis and interpretation two sides of the same coin Artistic research is a new perspective in knowledge acquisition and the performing artist is the pivot point The obvious insight positioning music beyond the score is elaborated into a critique of the representational theory as a relevant ontological discourse in music As an alternative the potential in embodied meaning theories is discussed through cognitive linguistic and artistic approaches Artistic expressions convey the subjective practitioner knowledge based on the difference between the objective sign and the intersubjective expression This makes music as communication the ultimate topic In conclusion understanding the meaning construction and the conditions of artistic content are both of importance in artistic research      Cognitive Semantics of Artificial Intelligence: A New

Perspective Alexander Raikov,2021-02-02 This book addresses the issue of cognitive semantics aspects that cannot be represented by traditional digital and logical means The problem of creating cognitive semantics can be resolved in an indirect way The electromagnetic waves quantum fields beam of light chaos control relativistic theory cosmic string recognition category theory group theory and so on can be used for this aim Since the term artificial intelligence AI appeared various versions of logic have been created many heuristics for neural networks deep learning have been made new nature like algorithms have been suggested At the same time the initial digital logical and neural network principles of representation of knowledge in AI systems have not changed a lot The researches of these aspects of cognitive semantics of AI are based on the author s convergent methodology which provides the necessary conditions for purposeful and sustainable convergence of decision making
