Transformation Livio Vacchini:

Transformation Werner Blaser, 1994 **Livio Vacchini** Werner Blaser, Jacques Gubler, Jean-Claude Vigato, 1994 Livio Vacchini is one of the most important exponents of Ticino architecture a style which has been claiming worldwide attention over the last two decades Of these Vacchini has been the most consequent developing for his buildings an individualized and elegant architectural language a language characterized by symmetry monumentality in small formal severity and a focus on essentials Tributes to classic modern architecture especially to the work of Frank Lloyd Wright Mies van der Rohe and Louis I Kahn are clear as are references to the primal stone architecture of Tessin It is impossible to work on a concept without realizing that this concept is the consequence of a different idea which by the same token has taken its form from a yet earlier idea thus Vacchini on the process of transformation The dynamics of this transformation leave a stamp on his disciplined rational working method and also on the quality of his nearly classicistic buildings in their urban or country settings This is the first comprehensive monograph to Livio Vacchini With the close cooperation of the architect it shows his development over the past 25 years from his own residence in Ascona 1969 and the primary school in Locarno 1970 1978 to the community apartments in Paris 1992 and the New School of Architecture in Nancy 1993 *Livio Vacchini* Roberto Masiero, 1999 **Livio Vacchini** Margherita Petranzan, 2003 International Books in Print , 1997 **Bracket 3** Lola Sheppard, 2022-03-18 Bracket at Extremes includes critical articles and unpublished design projects that investigate architecture infrastructure and technology as they operate in conditions of imbalance negotiate tipping points and test limit states We are conditioned as designers of the built environment towards the organization of people programs and movement Indeed the history of modern urbanism architecture and building science has been predicated on an anti entropic notion of programmatic and social order But are there scenarios in which a state of extremity or imbalance is productive Bracket at Extremes seeks to understand what new spatial orders emerge in this liminal space How might it be leveraged as an opportunity for invention What are the limits of wilderness and control of the natural and artificial the real and the virtual What new landscapes networks and urban models might emerge in the wake of destabilized economic social and environmental conditions Contemporary Authors New Revision Series Tracey Watson, 2005-09 A biographical and bibliographical guide to current writers in all fields including poetry fiction and nonfiction journalism drama television and movies Information is provided by the authors themselves or drawn from published interviews feature stories book reviews and other materials provided by the authors publishers Vernacular Architecture Newsletter , 1995 Livio Vacchini Livio Vacchini, Christian Norberg-Schulz, Jean Claude Vigato, 1987 **Stadtbaustein Schule: Dichte Nutzung, urbane Vernetzung** Österreichische Gesellschaft für Architektur, 2021-05-10 In wachsenden St dten haben Schulstandorte das Potenzial polyvalente Anlagen sowie lebendige Quartierszentren zu werden UMBAU 31 untersucht sowohl theoretische als auch praktische Aspekte der Mehrfach und Umnutzung von Bildungsbauten Im Zentrum stehen Fragen des Schulumfelds

which the graphic lexicon can be read from a beginning the ground to a conclusion the specific case studies Meant as a tool
to help you recognise analyse choose and invent solutions the book s key words refer to the physical and material
relationship between construction and ground to where and how the link is built to the criteria methods and tools used to
know and transform the ground and to the possible approaches to the place and their implications on the way the earth is
touched Fifty case studies by forty six of the greatest architects of the previous hundred years are represented throughout in
sectional drawings which place the buildings along the same ground plane to illustrate how the key words might be
combined and to show each architect s position on their built work in relation to all the others Includes projects by Alvar

English **Time, History and Architecture** Gevork Hartoonian,2017-10-12 Time History and Architecture presents a
series of essays on critical historiography each addressing a different topic to elucidate the importance of two influential
figures Walter Benjamin and Gottfried Semper for architectural history In a work exploring themes such as time autonomy
and periodization author Gevork Hartoonian unpacks the formation of architectural history the problem of autonomy in
criticism and the historiographic narrative Considering the scope of criticism informing the contemporaneity of architecture
the book explores the concept of nonsimultaneity and introduces retrospective criticism the agent of critical historiography
An engaging thematic dialogue for academics and upper level graduate students interested in architectural history and
theory this book aims to deconstruct the certainties of historicism and to raise new questions and interpretations from
established critical canons **Dizionario dell'architettura del XX secolo** ,2000 **Conceptual Design of Structures**
Pierluigi D'Acunto,Patrick Ole Ohlbrock,Roland Pawlitschko,2024-04-22 Most of the embodied energy can be saved in the
load bearing structure Conceptual Design of Structures is working at the interface between structural engineering
architecture and art The book seeks to answer the complex question of what needs to be considered when conceiving a

building structure What influences the process of conceptual thinking How do space and structure interact In what ways do architects and engineers work together The book thus sheds light on the topic of multidisciplinary interrelationships in design showing numerous different perspectives Renowned practitioners and researchers from architecture and engineering share their insights as do artists and historians who cross the disciplinary boundaries Furthermore this book also provides an outlook on possible future developments and aspects of sustainable design and construction Bridging practice academic and research Holistic perspectives through contributors from different disciplines Numerous essays interviews and project reviews provide direct insights Selected works from engineering architecture and art

Architecture and the Modern Hospital Julie Willis, Philip Goad, Cameron Logan, 2018-10-09 More than any other building type in the twentieth century the hospital was connected to transformations in the health of populations and expectations of lifespan From the scale of public health to the level of the individual the architecture of the modern hospital has reshaped knowledge about health and disease and perceptions of bodily integrity and security However the rich and genuinely global architectural history of these hospitals is poorly understood and largely forgotten This book explores the rapid evolution of hospital design in the twentieth century analysing the ways in which architects and other specialists reimagined the modern hospital It examines how the vast expansion of medical institutions over the course of the century was enabled by new approaches to architectural design and it highlights the emerging political conviction that physical health would become the cornerstone of human welfare
