Transformation Of War:

Transformation of War Martin Van Creveld, 2009-11-24 At a time when unprecedented change in international affairs is forcing governments citizens and armed forces everywhere to re assess the question of whether military solutions to political problems are possible any longer Martin van Creveld has written an audacious searching examination of the nature of war and of its radical transformation in our own time For 200 years military theory and strategy have been guided by the Clausewitzian assumption that war is rational a reflection of national interest and an extension of politics by other means However van Creveld argues the overwhelming pattern of conflict in the post 1945 world no longer yields fully to rational analysis In fact strategic planning based on such calculations is and will continue to be unrelated to current realities Small scale military eruptions around the globe have demonstrated new forms of warfare with a different cast of characters guerilla armies terrorists and bandits pursuing diverse goals by violent means with the most primitive to the most sophisticated weapons Although these warriors and their tactics testify to the end of conventional war as we ve known it the public and the military in the developed world continue to contemplate organized violence as conflict between the super powers At this moment armed conflicts of the type van Creveld describes are occurring throughout the world From Lebanon to Cambodia from Sri Lanka and the Philippines to El Salvador the Persian Gulf and the strife torn nations of Eastern Europe violent confrontations confirm a new model of warfare in which tribal ethnic and religious factions do battle without high tech weapons or state supported armies and resources This low intensity conflict challenges existing distinctions between civilian and soldier individual crime and organized violence terrorism and war In the present global atmosphere practices that for three centuries have been considered uncivilized such as capturing civilians or even entire communities for ransom have begun to reappear Pursuing bold and provocative paths of inquiry van Creveld posits the inadequacies of our most basic ideas as to who fights wars and why and broaches the inevitability of man s need to play at war In turn brilliant and infuriating this challenge to our thinking and planning current and future military encounters is one of the most important books on war we are likely to read in our lifetime [The Transformation of the World of War and Peace Support Operations](#)

Kobi Michael, David Kellen, Eyal Ben-Ari, 2009-03-20 With the end of the Cold War the euphoria of the Gulf War of the 1990s and the avowal of a New World Order peace operations were declared as the recipe for a better world through international intervention in conflict arenas However the debacles and failures in Cambodia Somalia or the Balkans led to disillusionment and a sense of strategic helplessness among leaders experts and scholars in the industrial democracies While these arguments have been the focus of intense criticism and discussion they nevertheless underscore the fact that since the end of the Cold War the armed forces of the industrial democracies have undergone very significant transformations This is the first work linking the changes in armed forces to Peace Support Operations PSOs those operations with major state building components that demand broad and coherent cooperation between military forces and civilian entities The Transformation of

the World of War and Peace Support Operations is timely as the recent debates over PSOs continue to take center stage This work embodies a new set of ideas and concepts that aid in grasping and interpreting the transformations taking place in the world of war and in PSOs It seeks to understand how social economic political and organizational transformations around the globe are related to the complex links between armed forces and PSOs Additionally this work addresses issues that continue to define the character and makeup of modern warfare and the missions of PSOs for coming decades

War and the Transformation of Global Politics V. Jabri,2007-01-31 Drawing on critical social and political thought the book explores the implications arguing that late modern wars wars often referred to as liberal may be interpreted as perpetuating forms of exclusion and domination that render war a tool of control now articulated in global terms

Transformation of the Indian Armed Forces: 2025 Maj Gen A K Lal (Retd),2012-05-09 Transformation should lie at the heart of our new approach to defense The development of transformational capabilities processes and force structures should be given strategic focus to meet the principal challenges under our defense strategy India is already ceased with the necessity of transformation albeit without any documented national security guidelines or operating instructions which are legislated or have the validation of at least the Cabinet Committee on Security CCS In other words the first step would be to create a draft security strategy based on many assumptions like the foreign policy or the cumulative emerging threat scenario as appreciated by the Defence Intelligence Agency DIA This well researched book is a result of the project allotted by the USI under the Field Marshal K M Cariappa chair The book is therefore more as an idea or a theoretical construct basically to bring in more clarity to the various options available for this great transformation of the Indian military The author has deliberated upon various landmarks of transformation milestones achieved so far by the three services and given recommendations to further build upon ongoing modernization plan and shift to a higher plane of transformational activities

The Transformation of Targeted Killing and International Order Martin Senn,Jodok Troy,2020-05-21 This comprehensive volume addresses the important question of whether and how the current transformation of targeted killing is transforming the global international order The age old practice of targeted killing has undergone a profound transformation since the turn of the millennium States resort to it more frequently especially in the context of counter terrorism operations The rapid development of surveillance and drone technologies facilitates targeted

killing missions and states are starting to slowly abandon their policies of secrecy and denial with regard to this form of violence To answer this question the volume introduces a theoretical framework that conceives the maintenance and transformation of international order as a dynamic triangular process between violence discourse and the institutions that make up the international order It then sheds light on different parts of this triangular process the reinterpretation of international law to legitimize targeted killing the contestation between state and non state actors over the development of a new targeted killing norm the emergence of targeted killing in the context of changes in the broader normative context of international order and the impact of new technologies in particular autonomous weapons systems on the future of targeted killing practices and international order This book was originally published as a special issue of Contemporary Security Policy
