Translation Spectrum:

Translation Spectrum Rose, 1981-01-01 The fascinating process of translation in its many varieties is the subject of the essays in this book Five of the essays discuss the theoretical aspects common to all works of translation Other essays elucidate the particular processes of translating literature drama social science classics and songs How computers can assist in translation and the economics of translation are the subjects of two of the essays Considering translation as a discipline the sixteen authors of these essays provide a complete perspective on translation for students considering translation as a career and for anyone interested in how a translation is made *Teaching Translation and Interpreting 2* Cay Dollerup, Annette Lindegaard, 1994-07-01 Selected papers from this second conference on Translator and Interpreter Training With contributions from five continents the articles deal with global challenges taking into account the role of the translator in societies knit together by one tongue and those in which languages are the repositories of national cultures such as India The main merit of this volume is that it shows how translator training is tackled in the main translator training courses around the world what requirements are made on the students and what solutions are given The various approaches provide a wealth of translator training ideas Complementing the first volume of papers from the Language International conference this second volume deals with a wide variety of aspects in this interdisciplinary field of study dubbing subtitling simultaneous consecutive interpreting court interpreter training linguistic features cognitive aspects cultural aspects terminology and specialisation computeraided translation in practice translation procedures at the European Commission etc *The Evolving Curriculum in Interpreter and Translator Education* David B. Sawyer, Frank Austerlühl, Vanessa Enríquez Raído, 2019-06-15 The Evolving Curriculum in Interpreter and Translator Education Stakeholder perspectives and voices examines forces driving curriculum design implementation and reform in academic programs that prepare interpreters and translators for employment in the public and private sectors The evolution of the translating and interpreting professions and changes in teaching practices in higher education have led to fundamental shifts in how translating and interpreting knowledge skills and abilities are acquired in academic settings Changing conceptualizations of curricula processes of innovation and reform technology refinement of teaching methodologies specific to translating and interpreting and the emergence of collaborative institutional networks are examples of developments shaping curricula Written by noted stakeholders from both employer organizations and academic programs in many regions of the world the timely and useful contributions in this comprehensive international volume describe the impact of such forces on the conceptual foundations and frameworks of interpreter and translator education *Traduction* Harald Kittel, 2004 This international encyclopedia documents and surveys for the first time the entire complex of translation as well as the operations and phenomena associated with it Structured along systematic historical and geographic lines it offers a comprehensive and critical account of the current state of knowledge and of international research The Encyclopedia 1 offers an overview of the different types

and branches of translation studies 2 covers translation phenomena including the entire range of interlingual intralingual and intersemiotic transfer and transformation in their social material linguistic intellectual and cultural diversity from diachronic synchronic and systematic perspectives 3 documents and elucidates the most important results of the study of translation to the present day as well as the current debates taking into account theoretical assumptions and methodological implications 4 identifies where possible lacunae in existing research listing priorities and desiderata for further research The languages of publication are German English and French

Knowledge and Skills in Translator Behavior Wolfram Wilss, 1996-04-01 This book represents an approach which is intended to give readers a general insight into what translators really do and to explain the concepts and tools of the trade bearing in mind that translation cannot be reduced to simple principles that can easily be separated from each other and thus be handled in isolation On the whole the book is more process than product centred Translation is seen as an activity with an intentional and a social dimension establishing links between a source language community and a target language community and therefore requiring a specific kind of communicative behavior based on the question Who translates what for whom and why To the extent that the underlying principles assumptions and conclusions are convincing to the reader the practical implications of the book last but not least in translation teaching are obvious
