ENOKKAREN,AVINASH ATTIPALLI,VETRIVELAN TAMILMANI,RAMI REDDY KOTHAMARAM, **Technology Transfer and Innovation for Low-Carbon Development** Miria Pigato,Simon Black,Damien Dussaux,Zhimin Mao,Ryan Rafaty,Simon Touboul,2020-04-09 Technological revolutions have increased the world s wealth unevenly and in ways that have accelerated climate change This report argues that achieving The Paris Agreement s objectives would require a massive transfer of existing and commercially proven low carbon technologies LCT from high income to developing countries where the bulk of future emissions is expected to occur This mass deployment is not only a necessity but also an opportunity Policies to deploy LCT can help countries achieve economic and other development objectives like improving human health in addition to reducing greenhouse gases GHGs Additionally LCT deployment offers an opportunity for countries with sufficient capabilities to benefit from participation in global value chains and produce and export LCTs Finally the report calls for a greater international involvement in supporting the poorest countries which have the least access to LCT and finance and the most underdeveloped physical technological and institutional capabilities that are essential to benefit from technology

**Machine and Industrial Design in Mechanical Engineering** Milan Rackov,Aleksandar Miltenović,Milan Banić,2025-01-01 This book gathers the latest advances innovations and applications in the field of machine science and mechanical engineering as presented by international researchers and engineers at the 12th International Conference on Machine and Industrial Design in Mechanical Engineering KOD held in Balatonfured Hungary on May 23 26 2024 It covers topics such as mechanical and graphical engineering industrial design and shaping product development and management complexity and system design The contributions which were selected by means of a rigorous international peer review process highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaborations

Design and Operation of Automated Container Storage Systems Nils Kemme,2012-11-07 The storage yard is the operational and geographical centre of most seaport container terminals Therefore it is of particular importance for the whole terminal system and plays a major role for trade and transport flows One of the latest trends in container storage operations is the automated Rail Mounted Gantry Crane system which offers dense stacking and offers low labour costs This book investigates whether the operational performance of container terminals is influenced by the design of these storage systems and to what extent the performance is affected by the terminal s framework conditions and discusses the strategies applied for container stacking and crane scheduling A detailed simulation model is presented to compare the performance effects of alternative storage designs innovative planning strategies and other influencing factors The results have useful
