Transport Systems In Plants:

Transport Systems in Plants Jeffrey Moorby, 1981 The evolution of transport systems in plants The movement of carbohydrates The movement of water and ions Transport systems and plant growth **Transport Systems in Plants** J. Moorby, 1981 The evolution of transport systems in plants The movement of carbohydrates The movement of water and ions Transport systems and plant growth *Plants in Agriculture* James C. Forbes, Drennan Watson, 1992-08-20 The effective management of plants is fundamental to all agricultural enterprise making plant science a key discipline for all growers This book provides an integrated explanation of all aspects of plant structure and function for students of agriculture horticulture and applied biology with the aim of highlighting the practical relevance of plant science to agriculture Each chapter is self contained and self explanatory with specific chapters covering energy water minerals structure growth and development from sowing to harvest environmental effects and controls breeding vegetative propagation field production and yield and the nutritional content of produce Taken as a whole *Plants in Agriculture* fulfills the need for a single text which promotes a comprehensive understanding of how plants operate in agriculture **Advanced Biology** Michael Roberts, Michael Reiss, Grace Monger, 2000 The major new course text has been written by experienced authors to provide coverage of the Advanced Subsidiary AS and Advanced GCE Biology and Human Biology specifications in a single book *Advanced Biology* provides clear well illustrated information which will help develop a full understanding of biological structure and function and of relevant applications The topics have been carefully organised into parts which give a logical sequence to the book This new text has been developed to replace the best selling titles *Biology Principles and Processes* and *Biology A Functional Approach* Features include full colour design with clear diagrams and photographs up to date information on biotechnology health applied genetics and ecology clearly written text using the latest Institute of Biology terminology a useful summary and a bank of practice questions at the end of every chapter support boxes help bridge the gap from GCSE or equivalent courses extension boxes providing additional depth of content some by guest authors who are experts in their field and a comprehensive index so you can quickly locate information with ease There is also a website providing additional support that you can access directly at www.advancedbiology.co.uk *Communication in Plants* František Baluška, Stefano Mancuso, Dieter Volkmann, 2007-02-15 Plant neurobiology is a newly emerging field of plant sciences It covers signalling and communication at all levels of biological organization from molecules up to ecological communities In this book plants are presented as intelligent and social organisms with complex forms of communication and information processing Authors from diverse backgrounds such as molecular and cellular biology electrophysiology as well as ecology treat the most important aspects of plant communication including the plant immune system abilities of plants to recognize self signal transduction receptors plant neurotransmitters and plant neurophysiology Further plants are able to recognize the identity of herbivores and organize the defence responses accordingly The similarities in animal and plant neuronal immune systems are discussed

too All these hidden aspects of plant life and behaviour will stimulate further intense investigations in order to understand the communicative plants in their whole complexity
