Transputers In Real Time Control:

Transputers in Real-Time Control G. W. Irwin, P. J. Fleming, 1992-12-08 Describes applications of the transputer for real time control across the spectrum of engineering The text concentrates on transputer architecture and real time control with a strong emphasis on case studies and practical applications in many fields of engineering **Transputer Applications** Mike R. Jane, Raymond J. Fawcett, Terry P. Mawby, 1992 The symposium held in Reading in March 1992 celebrated the completion of a 5 year Initiative in the Engineering Applications of Transputers It reviewed achievements in a range of applications and supporting fields and predicted future developments This book represents a collection of articles presented at this meeting as well as independent reviews of the Transputer Initiative **Transputer Applications and Systems '93** Reinhard Grebe, 1993 Proceedings Parallel Computing **Artificial Intelligence in Real-Time Control 1995** J. Kocijan, R. Karba, 1996-07-03 The Sixth International IFAC Workshop on Artificial Intelligence in Real Time Control was held in Slovenia in 1995 and provided a forum for leading researchers and practitioners in this field to exchange ideas and results This postprint volume from the workshop contains all the papers presented there and features five plenary lectures by distinguished control artificial intelligence scientists The approaches covered in the papers include fuzzy control artificial neural networks expert systems and machine learning whilst the Technical Programme highlights a variety of methods from artificial intelligence fields applied for control problems Transputer and Occam Developments World Occam and Transputer User Group. Technical Meeting, 1995 This volume contains papers presented at the 18th meeting of the World Occam and Transputer User Group Wotug The papers cover a wide range of transputer and OCCAM related topics such as the porting and development of the OCCAM language highlighting the need for cross platform implementations of OCCAM compilers design approaches and applications **The Transputer in Australasia** Australian Transputer and OCCAM User Group, 1990 **The Transputer in Australasia** John Hulskamp, Terry Bossomaier, Tom Hintz, 1991 Covering recent developments involving transputer technology in the Australasian region this work contains 35 papers addressing transputer applications in communications networks fuzzy systems image processing and medical equipment **Transputer Based Real-time Process Control** Sasidhar V. Challa, 1992 *Real-time Systems with Transputers* Occam User Group. Technical Meeting, 1990 Parallel Programming of Transputer Based Machines Traian Muntean, 1988 This publication contains papers from the Occam User Group OUG The main aim of the OUG is to act as an independent forum for the exchange of ideas results and information in research and development of projects in the area of parallel systems design and programming using various communicating processes oriented approaches for transputer based machines The papers collected in this volume cover topics such as methodology of Occam programming parallel asynchronous algorithms control of real parallelisms in highly parallel machines of transputers applications in scientific programming real time processing image processing etc **Parallel Processing in Digital Control** D. Fabian Garcia Nocetti, Peter J. Fleming, 2012-12-06

Parallel Processing in Digital Control is a volume to be published in the new Advances in Industrial Control series edited by Professor M J Grimble and Dr M A Johnson of the Industrial Control Unit University of Strathclyde The growing complexity of digital control systems in such areas as robotics flight control and engine control has created a demand for faster and more reliable systems This book examines how parallel processing can satisfy these requirements Following a survey of parallel computer architectures MIMD Multiple Instruction Multiple Data machines are identified as suitable systems for digital control problems which are characterised by a mixture of regular and irregular algorithmic tasks An example of a typical MIMD architecture suitable for real time control the Inmos Transputer is introduced together with its associated parallel programming language Occam The key problem in implementing parallel software is associated with mapping parallel tasks onto physical processors In this book a variety of schemes are described and assessed to help illustrate potential areas of difficulty for the real time control software engineer Solutions are proposed and tested on a flight control case study example Recognising the widespread acceptance of MATLAB and its derivatives for computer aided control system design this book demonstrates how mapping strategies can be realised in this environment and integrated with a transputer development system for on line performance evaluation A case study example demonstrates the power of this approach and important issues are highlighted Readers will experience the advantages of parallel processing in digital control while being made aware of the key factors to be considered in the development of an effective solution Practising control engineers and graduate post graduate students will find the book of particular interest and benefit
